

Cap-and-Invest Could Mean Major Investments in the Capital Region

The new report *Cap-and-Invest to Meet New Yorkers' Needs* lays out just how the Clean Air Initiative could change New Yorkers' lives for the better. Published and co-authored by Spring Street Climate Fund, New Yorkers for Clean Air, and Climate Jobs New York, the report details nearly two dozen programs that could be funded by cap-and-invest revenues, and demonstrates the impact of those investments on New Yorkers' day-to-day lives.

Cap-and-invest revenues could support major infrastructure improvements and cost savings in the Capital Region. Our modeling shows that working families in the Capital Region would receive substantial utility rebates, assistance weatherizing their homes, easier access to electric vehicle chargers, and more.

With a robust cap-and-invest program in place, Capital Region residents would save money, breathe cleaner air, and live in safer, more comfortable homes. The Clean Air Initiative would make positive change in communities across New York, with concrete benefits to help families and meet critical community needs in the Capital Region.

MAJOR CAP-AND-INVEST BENEFITS for the Capital Region

- **407,696** households would get **\$266** in average utility bill rebates each year
- **29,902** homes could receive weatherization assistance and save **\$660** a year on energy bills
- **565** fast electric vehicle chargers
- **36,251** local homeowners could get **\$5,000** more to install rooftop solar
