- And offering a complete package of services that includes **web-security**, protecting you from unwanted attacks

## SKILLS

- Web Design
- Web Development
- Teamwork
- Work speed
- Leadership
- Effective Communication
- Critical Thinking

## PROFILE

My name is Harun Atajić, a young enthusiast in the world of technology at the age of 19. My passion for technology started back in high school, where I was educated as a mechanical technician for computer-aided design. This education has provided me with a solid foundation in drawing, designing, modeling, and programming, giving me my first steps towards the world of digital creation.

## THE PATH TO MY KNOWLEDGE

### My experience

- After finishing high school, I briefly worked in hospitality, where I developed key skills in communication and time management, which later proved invaluable in my professional development. However, my true passion was always directed toward technology and development, motivating me to dedicate my free time to improving in this area.

### WEBFLOW (no-code) platform

- With this goal, I enrolled in a web flow development course, where I had the opportunity to learn from an experienced programmer with more than 15 years of experience. This course opened my eyes to the possibilities of no-code programming, with a special focus on Webflow, the leading platform in this segment. I gained a deep understanding and practical skills in creating websites that are visually appealing, functional, and optimized for search engines, ensuring better visibility and accessibility to clients.

### Further learning

- I am currently involved in the second part of the course, which deepens my knowledge of no-code programming, allowing me to expand and improve my services. Through working on different projects, I have developed the ability to create websites that not only meet the aesthetic and functional needs of clients but also provide a secure environment for users and visitors.

### Understanding the standards

- Through this path, I have not only gained technical knowledge and skills but also an understanding of the importance of adapting to the needs of clients and the market. My dedication to continuous learning and development, together with practical experience in applying no-code tools, makes me an ideal partner for anyone seeking efficient and innovative web solutions.
