

Swift Ray™

Powerful in Your Pocket.
Medical Imaging for Everyone.

Introducing the world's first pocket-sized, wireless, over-the-lens device for advanced wound imaging. Measure the invisible with ease and transform your smart device into a medical-grade imaging device.

- **Goes Anywhere:** No wires needed; fits in your pocket and connects wirelessly.
- **No Duplicate Documentation:** Leverages all the existing integrations, workflows, and dashboards of Swift Skin & Wound™.
- **No Special Training:** Staff can learn the technology quickly, often in less than an hour.
- **Any Skin Color:** Below-the-surface imaging that provides the same clinical utility regardless of skin tone.

Bacterial Imaging

Assists clinicians during infection assessment and debridement practice.

Thermal Imaging

Captures temperature data for clinicians to evaluate for inflammation or infection signs.
