

Signing banks UK Case Study

At SignScription, we understand that not all Deaf people are the same. Some are fluent users of BSL (British Sign Language), others prefer SSE (Sign Supported English) and some don't sign at all.

About SignScription

Assumptions

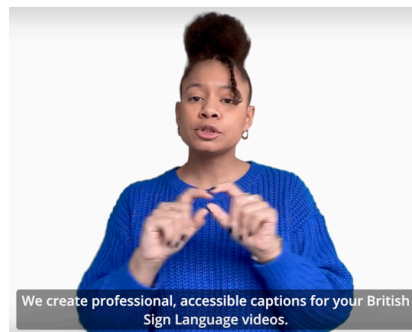

Whilst it's often an assumption that Deaf people will be able to understand written English, we understand that not all Deaf people have the same literacy levels.

BSL Act

So with the UK Government's recent passing of the BSL act and subsequent announcement by the Education Secretary of the option to study BSL as a GCSE from September 2025, we are committed to support the continued hard work of Deaf charities and agencies towards full access for Deaf people across the board in The UK.

We produce high quality BSL videos for websites and social media, featuring clear English subtitles, with spoken voiceover tracks for full accessibility for all types of Deaf people. If you're a company or organisation with a Deaf audience, contact us now to see how we can help you reach them
