

# EMMANUEL BOUCHET

## COMPLICATION ONE

### CONTRAST BLACK

#### THE DECONSTRUCTION OF TIME

**Emmanuel Bouchet's vision for this collection is to create a space where time is not simply measured, but separated and observed in a dreamlike way. This is the essence of his vision – a timeless pause in a world that never stops.**

Shadow and light complement the very essence of the Complication One Contrast, a multidimensional timepiece where opposites attract with a unique transmission system and way of reading time. Unveiling itself from a new perspective, the contrast between black and white is striking and sleek. As the magic unfolds, it transports the wearer through a unique experience of observing time through a new lens.

The Complication One Contrast is powered by the Manufacture calibre EB63E, a mechanical, hand-wound movement composed of 339 parts developed exclusively for this timepiece and entirely made at Emmanuel Bouchet's workshop in Switzerland. Nestled in an elegant and contemporary 44mm case, the very essence of the mechanism is given a prominent place on the dial ensemble.

Positioned at the centre stage, the escapement has been slowed down on the dial side to allow the wearer to contemplate the movement and understand how time works mechanically in a captivating and unique way.

Price: CHF 127,000 | [www.emmanuelbouchet.com](http://www.emmanuelbouchet.com)
