

Reduce clinical admin time and capture meaningful outcomes at scale

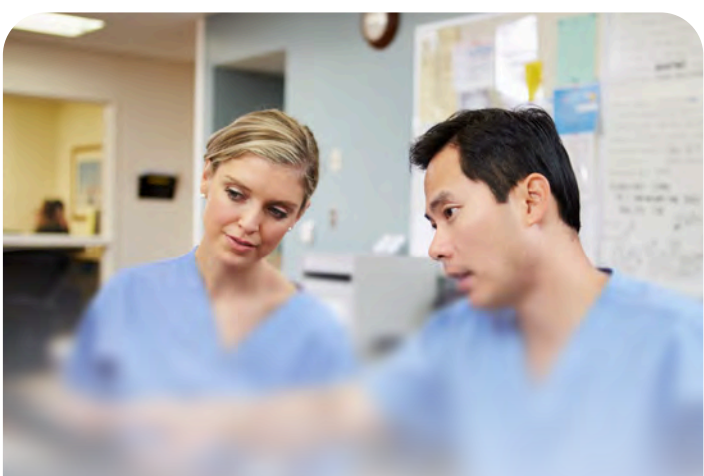

Move from fragmented, paper-based outcome capture to integrated, real-time clinical insight

Digitise ePROMs and ePREMs directly into your EPR to improve insight, engagement, and service performance across pathways.

25mins
Time saved per assessment

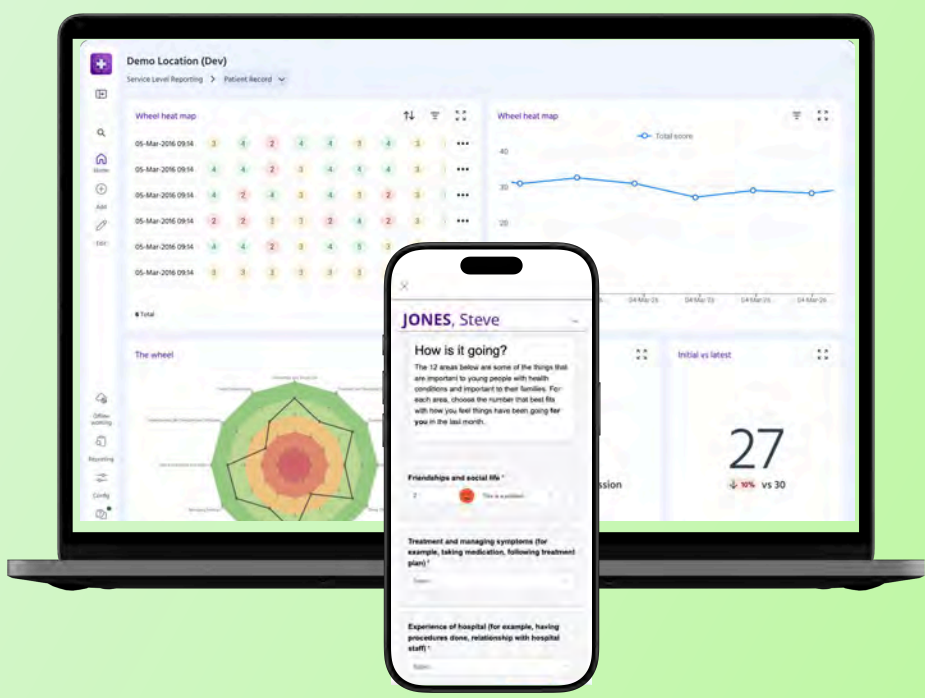

120%
Increased response rates

12mins
Save ~ 12mins per appointment

Built for NHS Services

- Patient outcome monitoring
- Workflow automation
- Service insights

How it works in your service

01 Digitise existing PROMs in days

Deploy quickly across all settings

02 Automated scoring of clinical questionnaires

Streamline clinician workload

03 Integrates data into your EPR

No duplicate data entry or logins. Patient, team, and service outcomes

04 Real-time insight dashboards

Patient, team, and service outcomes

Why NHS Trusts are adopting ePROMs now

- Outcomes-based commissioning
- Evidence intervention effectiveness
- Reduce admin burden on clinicians
- Focus on service improvement

Real world impact

80%
reduction in PROMs administration time

~12mins
Saved per appointment

66%
Reduction in time to process sleep diaries

Governance and assurance

Built for NHS data governance. our software meets stringent NHS security and procurement requirements, ensuring patient data is protected.
