# Secure Your Online Accounts

Password Manager

## Don't Let Your Sensitive Information Fall Into the Wrong Hands

In today's digital landscape, **your personal information is a valuable target**. Weak passwords, unmanaged digital files, and exposed data on the dark web leave you vulnerable to cybercrime.

### What Can Happen When Your Account Credentials Are Compromised?

#### Account Takeover

Hackers can gain unauthorized access to your online accounts and passwords through data breaches or phishing attempts.

#### Financial Fraud

Hackers can take control of your bank account, credit cards, investment accounts, and more.

#### Identity Theft

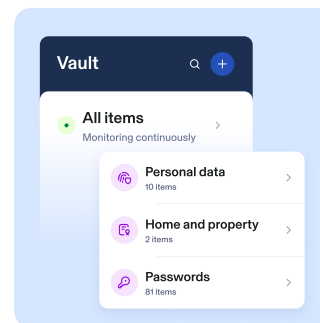

If your personal data appears on the dark web, it can be bought and sold, increasing your risk of identity theft.

#### Did You Know?

More than **1.7 billion people** had their data compromised in breaches during 2024.<sup>1</sup>

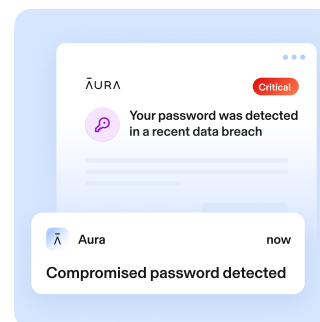

Last year, nearly **one in four consumers** were victims of account takeover fraud.<sup>2</sup>

### Aura: Your Digital Lockbox

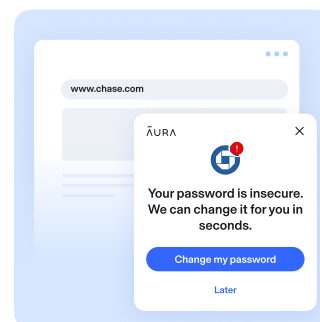

#### Vault

Securely store sensitive data, digital files, and passwords with military-grade encryption – **all in one place**. We'll automatically enable monitoring and alerts for the content of your Digital Vault.

#### Dark Web Monitoring

Get alerted if your registered online accounts **have been breached or found on the Dark Web**.

#### Automatic Password Updates

Automatically change weak or breached passwords **with one click**. We'll even suggest a strong password and fill it in automatically.
