

On-Site Hydrogen Generation | Purification | Dispensing

On-Site Hydrogen Supply | No CapEx Required

the no_CapEx_H2 company

Reliable Hydrogen — Produced Where You Need It

ESSNA™ and 59Hydrogen™ deliver integrated systems that generate, purify, compress, store, and dispense hydrogen directly at your facility. Modular containerized platforms ensure dependable hydrogen supply for fleets and industrial operations.

Your Core Benefits

- ✓ On-site hydrogen generation eliminates delivery logistics
- ✓ Fuel-cell grade hydrogen purity
- ✓ Integrated generation, purification and dispensing
- ✓ Modular containerized infrastructure
- ✓ Scalable for industrial demand and fleets

The ESSNA™ / 59Hydrogen™ Advantage

- ✓ No CapEx deployment model available
- ✓ Integrated turnkey hydrogen infrastructure
- ✓ Specifically Designed for fleets, industry and energy systems
- ✓ Modular expansion as demand grows

Simple Deployment, Immediate Supply

ESSNA™ systems produce hydrogen directly at your facility using modular containerized equipment. Integrated generation, purification, compression and dispensing deliver reliable hydrogen without delivery logistics.

Next Step

Request a Hydrogen Infrastructure Working Note. See how on-site hydrogen can support your fleet or facility.
