

Technical Workshop Session Catalog

Build a competitive edge with AI Agents on Domo with AWS (Advanced)

Modernize legacy processes and unlock new opportunities by combining Agent Catalyst with Domo's data tools. In this hands-on session, you'll learn how to automate manual workflows with governed data access, agentic reasoning, and human-in-the-loop reviews. We'll also walk through deploying AI agents to internal and external users as part of your managed data and AI product strategy.

Automate requests, approvals and user data updates via Domo Workflows (Advanced)

Harness the power of Workflows in Domo to solve common use cases such as requests, approvals and users performing data updates. We will teach you how to capture user input, run it through a flow (that can include human in the loop activities) to streamline processes and increase efficiency. In this small group setting, you'll not only learn how to create these, but actually build and run one yourself right in the training!

Instance governance 101: Keep your instance running healthy and clean (Intermediate)

Come and learn the governance tips and tricks for keeping your instance running well. We will cover some of the basics of Domostats, Groups, Roles, and the Governance Toolkit. Bring your questions and we will dive into using Domo to govern Domo.

Domo Apps Hands-On: Create Editable Tables with Domo's App Studio (Intermediate)

Join this interactive, hands-on session to learn how to build epic data products in Domo using the Domo App Studio. We'll walk step-by-step through the creation of an editable table app empowering you to capture user input, update data, and create dynamic, interactive experiences directly within Domo. This session will combine no-code and low-code components to build scalable, user-friendly apps that extend what's possible in Domo.

Terms, tools, and next steps: An AI primer in Domo (Beginner)

This session is a primer to help you understand the foundation elements of AI and how to start using AI in Domo. We will cover everything from AI Chat and AI Models to Agentic AI basics. If you are just starting your AI journey in Domo, this is the session for you!

Shape the future: Hands-on testing of features in development (All levels)

Step behind the curtain in this interactive session with Domo's Product Designers working to improve how you interact with your data. In a small-group setting, you'll get exclusive, hands-on access to features in development, explore how they work, and share your feedback directly with the creators. Help shape the future of Domo.
