 - Accessibility Standards Compliance 5
 - Third-Party Content..... 5

Estu is committed to ensuring the accessibility of its website for all users, including disabled users and people who use assistive technologies. We aim to conform to the Web Content Accessibility Guidelines (WCAG) version 2.2 Level AA, where proportionate and applicable to our website and digital services.

How accessible this website is

We aim to make our website clear, usable and accessible. This includes making sure that users can navigate the website using a keyboard, resize text, understand page structure, complete forms, and access information using assistive technologies where possible. We recognise that some content may not yet be fully accessible and we will address issues where they are identified and proportionate to resolve.

Accessibility Features Implemented

- **Keyboard Navigation:** Our website is designed to be navigable using only a keyboard, allowing users who cannot use a mouse to access all features and content.
- **Colour Contrast:** We have ensured sufficient colour contrast throughout our website to make text and interactive elements easily distinguishable for users with low vision or colour vision deficiencies.
- **Resizable Text:** Text on our website can be resized using browser controls, accommodating users with low vision who may need larger text sizes.
- **Accessible Forms:** All forms on our website are designed with proper labelling and error identification to facilitate completion by users with disabilities.

Known limitations

Some older documents, PDFs, embedded media or third-party content may not fully meet accessibility standards. Where we identify accessibility barriers, we

will consider whether the content can be amended, replaced with an accessible alternative, or provided in another format on request.

Feedback and contact information

We are continuously working to improve the accessibility of our website. If you encounter an accessibility barrier, need information in a different format, or have suggestions for improvement, please contact us at support@estuglobal.com.

Please include the page or document you were trying to access, the issue encountered, and your preferred contact details. We will review the request and aim to respond within 10 working days.

Accessibility Standards Compliance

Where applicable, our website endeavours to conform to WCAG 2.1 Level AA standards. Estu reviews website accessibility periodically and when significant website changes are made. Reviews may include automated accessibility checks, manual checks of key pages, user feedback, and supplier or platform updates where relevant.

Third-Party Content

While we aim to ensure that content under Estu's control is accessible, some third-party platforms, embedded content, forms, media or applications may not be fully within our control. Where users encounter accessibility issues with third-party content linked to Estu's services, we encourage them to contact us so we can consider reasonable steps to resolve or work around the issue.

Accessibility Tools

We recommend the use of assistive technologies such as screen readers or browser extensions to enhance the accessibility of our website.

Further Assistance

If you require further assistance accessing our website or have specific accessibility needs, please contact us at support@estuglobal.com and we will be happy to assist you.
