Map Current State	Assess With Stakeholders & End Users	Prototype Solutions	Learn Through Testing	Enable What Works	Scale Across The System
What practices are producing current outcomes? What are the system assets and leverage points?	Who is most impacted by the problem? Whose practices need to change to advance our future state?	What small moves could shift the system?	How will you know if your approach is working from the perspective of those implementing and experiencing it?	What decisions or supports could remove blockers and strengthen what's effective?	What needs to be in place for your successful approach to spread and be sustained?
