

ARI 10<sup>9</sup>

# Simplicity in Deflation, Power in Utility

Back in 2017, we started our journey with an online exchange Bitcan. Back then, we created the first widget for buying BTC BitcoinWidget. We have built a network of cryptocurrency exchange points across the country since 2019 as a Cryptoterminal. But right now All our products are now under the Ari10 brand. Products form a cohesive ecosystem connected by the Ari10 token.

## Where does our project fit into all of this? The answer lies within this document.

The token was designed not just for funding our project, but to serve as a complement and enhancement to our ecosystem. A community is being cultivated around the token, extending beyond our current customer base, and actively contributing to the swift scaling of our business.

## REGULAR RETURN OF THE VALUE OF THE TOKEN

We have been delivering value since 2017, and today we simply have too much to lose to exit the market immediately following tokenization. Our roadmap stretches many years into the future, and effective execution will continually increase the token's value.

# Why you can trust us?

## A BUSINESS WITH TRACTION

Our token supports an existing business, which brings a 30-fold increase in sales y2y, and the prognoses show that we're just getting started.

## WE DON'T MIND IF WINTER IS COMING

Exchanging cryptocurrencies into fiat currencies is the core of our operations, which results in us making profits regardless of whether BTC gains or loses. Irrespective of whether we're in a crypto winter or crypto summer – people will always keep buying and selling currencies, hence using an exchange service.

# ARI 10<sup>9</sup> Ecosystem

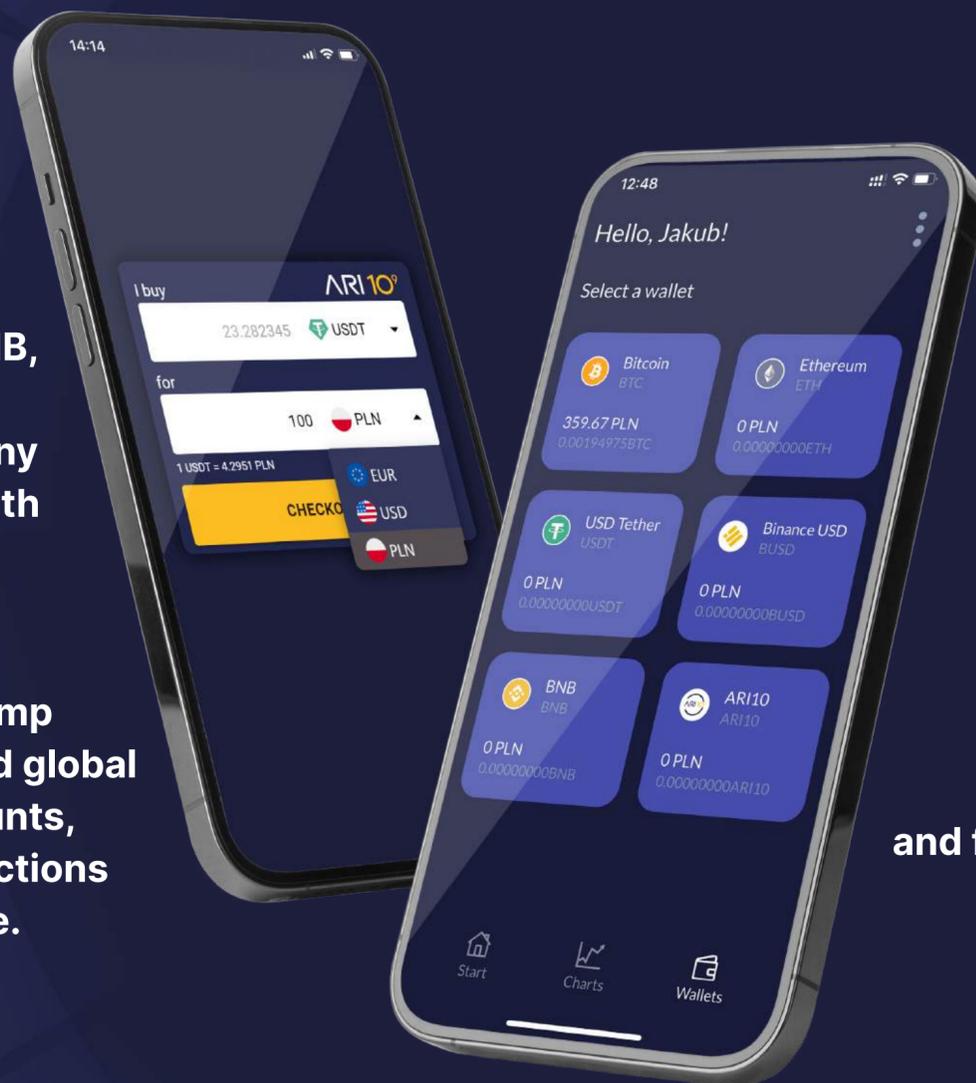

## Gateway:

The Gateway On-Ramp is a versatile system designed for swift and confidential purchases of BTC, ETH, USDT, BNB, and other cryptocurrencies. It can seamlessly integrate into any website, proving beneficial for both crypto and non-crypto projects engaged in tokenization.

Conversely, the Gateway OFF-Ramp offers the capability for expedited global withdrawals to cards, bank accounts, and e-wallets, completing transactions in less than 15 minutes worldwide.

## Mobile Apps:

Ultimately offering advanced features for account management and business scalability to our clients.

## ARI 10<sup>9</sup> Consulting

Professional crypto training for companies and institutions.

## Exchange:

Secure crypto-wallet and fastest-growing crypto exchange in Poland.

## Cryptoterminal:

Safe device and software which allows entrepreneurs to open their own stationary crypto-exchange.

## Token:

Creates a prevalence around products by adding additional value.

# TOKENIZATION

ARI10 is a low-market-cap token, but envision its potential during the upcoming bull market. While this might be seen as a promise, it's important to note..."

tylko orientacyjnie ilość wykresów

**... However, at a time when most projects were making empty promises, we diligently fulfilled every aspect of the plan outlined in our previous whitepaper.**

When the utility  
**STARTS!**

# 1. Staking: Let your tokens, **work for you**

## HOW TO START STAKING

[link + regulamin ikonka do kliknięcia](#)

icon example

Staking involves locking up Ari10 tokens in tokenpanel to support network functions. Stakers contribute their digital assets, in return, earn rewards in the form of additional tokens. It's a way for crypto holders to actively engage in network operations and earn passive income.

## TREASURE & AIRDROPS

[link + regulamin ikonka do kliknięcia](#)

icon example

Airdrops: Free token giveaways to engage and promote cryptocurrency projects. Users receive tokens for simple actions, fostering awareness and community building. Airdrops are tailored for our ARI10 token stakers.

Stake your Ari10 tokens on our staking tiers and enjoy airdrops from projects collaborating with Ari10 in the payment gateway realm. The airdrop amount is based on your deposited tokens, pool allocation, and chosen tier. Details can be found at [link](#)

Early withdrawal from a time-locked staking tier incurs a penalty fee, distributed among users adhering to the lock-up period. This solution allows flexibility for users facing financial difficulties and benefits those who maintain the set lockout period during potential token price increases.

Tabelka

# 1. Staking:

## WhaleClub

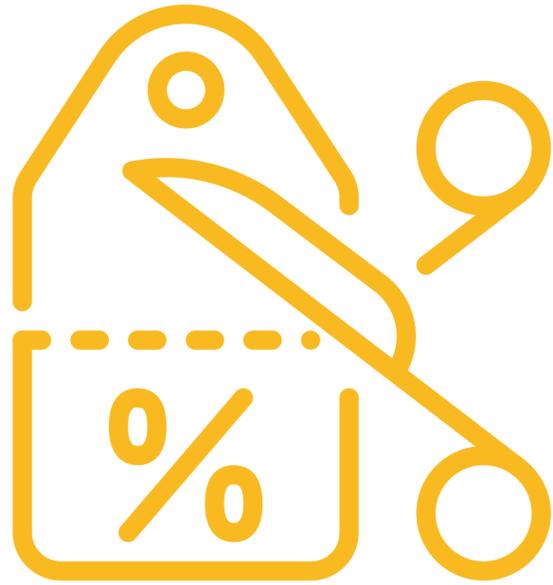

Whale Club in the context of Ari10 typically refers to an exclusive group of investors or individuals holding a substantial amount of ARI10 tokens, commonly referred to as “whales” in the cryptocurrency world. To qualify as a whale in the Ari10 ecosystem, one needs to possess minimum of 777,777 ARI10 tokens for first 50 whales (As the number of whales increases beyond 50, the amount contributed will be 3% higher than the previous one).

Members of the Whale Club enjoy special privileges and benefits, including exclusive access to certain features, preferential Airdrop terms, and bonuses. These exclusive perks are designed to recognize and reward the significant contributions and commitment of large ARI10 token holders.

# 1. Staking:

## DISCOUNTS

Discounts have been implemented for our investors and partners. All you need to do is stake an appropriate amount of tokens to enjoy discounts on our products. Discounts range from 5% to 50%, and you can find more information by visiting the provided link.

## GOVERNANCE

[link + regulamin ikonka do kliknięcia](#) 

Governance in the context of cryptocurrencies refers to the decision-making process regarding protocol changes, rules, and overall project management. It involves mechanisms such as community voting, decentralized governance, and proposals for protocol improvements. Governance empowers the cryptocurrency community to actively participate in shaping the future development of the project.

A governance token, within this framework, grants holders the right to vote or influence decisions pertaining to the cryptocurrency ecosystem. It plays a crucial role in fostering decentralization and democratic decision-making within blockchain projects.

## 2. Farming

Crypto farming, also known as “yield farming” or “liquidity farming,” involves investors intentionally providing their cryptocurrencies to various decentralized finance (DeFi) protocols to earn additional tokens as rewards. The primary goal is to maximize returns on invested funds. One common type is liquidity farming, where participants contribute to a liquidity pool, enabling others to trade those assets, and, in return, they receive tokens representing their share in the pool, along with additional tokens as rewards from the DeFi protocol.

**Additionally all of our farmers can be involved in governance process**

# Ari10 Cryptoterminal Customers

For Ari10 Cryptoterminal customers, including our franchise points, the process is easy. You don't even need an account – just your crypto wallet! Conduct a transaction at one of our physical or mobile offices, complete the form, and enjoy the Ari10 commission rebate in our tokens. Please note that the tokenback applies to the commission charged by Ari10 as the operator, and the commission collected by the local point will not be returned as a tokenback. Locate the nearest transaction point on the map.

# ...there is Rise of the Bulls

## Rise of the Bulls encompasses:

### WHAT IS IT?

It's not just an initiative but a mission aimed at heating up.

### RISE OF THE BULLS ENCOMPASSES:

- A marketing plan designed to reach a larger audience.
- Enhancing the deflation process as the primary method to increase token rarity.
- Increasing community engagement through participation in the governance process and grassroots initiatives.
- Introducing additional utilities for the token.
- Sending a clear signal that we're not here for a moment, and we intend to stir things up even more!

# New tokenomics

As we have concluded the vesting period, all advisory, public and seed sale tokens have been disbursed, along with all due team tokens. Based on hard data, we have reprogrammed the tokenomics to better align with market needs, further reducing the Token Supply (TS).

Nowa tokenomia	
Marketing	79 200 000,00
Liquidity	40 000 000,00
Staking rewards	35 200 000,00
Afiliate founds	20 000 000,00
Strategic partnerships	20 000 000,00
Emergency Funding	15 600 000,00
Community Initiatives	10 000 000,00
Suma	220 000 000,00

**Marketing** - as the most important part of token growth. It will be the biggest pool, but will be used only if we reach listing price. Till that moment, we will use company funds for any actions.

**Liquidity** - new pool that doesn't include lp's we put in liquidity as it will remain there. It will be used only as a source of liquidity for new exchanges.

**Staking rewards** - As all you know we are lowering the inflation, but we plan to keep staking and farming till november 2025.

**Affiliate rewards** - These are all the rewards used in the affiliate program and circulating within our ecosystem. Their quantity will not change over time, as all issued tokens will be repurchased in the same amount. This pool is designed to secure internal settlements.

**Strategic partnerships** - tokens used to fulfill external ecosystems and play a vital role in synergic growth.

**Emergency funding** - pool used in any case that is not stated above and would need to use tokens as part of the deal or funding.

**Community initiatives** - That fresh new pool is created for the community and their ideas, which can be voted over the governance process.

**What will happen with the rest of the tokens? Scroll down!** 

# Less tokens, **MORE VALUE**

## PAST:

- Since start in 04.11.2021 we bought back and burnt nearly 80M tokens
- Even in the bear market we permanently removed more than 9 % of total supply

## FUTURE:

- As for the Q4 of 2023 We plan to continue buy-backs and burns until we reach 220M of burnt tokens, which represents 25% of TS (approx. 74m)
- As part of the “bulls of the rise” initiative, an additional 180 million tokens will be burned at a daily rate of 1 million, commencing from the BTC halving date. These tokens are sourced from the initial tokenomics.
- There could be additional burn, the magnitude of which will depend on community initiative.
- We aim to reduce our total supply by half.

The bulls are on the verge of uncovering a new way to leverage the ARI10 token, potentially ushering in a transformative era for the world of bulls.
