OVERVIEW

Lantech IMR-3002 series is a next generation industrial multi-function VPN router w/ up to 2x LTE modem + 2x Gigabit Ethernet (incl.1 PD) + 2 serial ports that supports advanced function of VPN, Load-Balancing, EMMC Flash Storage**, Protocol gateway(Modbus), and LTE quad SIM fail-over for industrial applications. The dual core CPU with 1.6GHz + 256M flash enables the router to multi-task smoothly.

Dual concurrent LTE design 4G/3G for load-balancing

With dual LTE module design (2L model), 4 SIM card slots, IMR-3002 can allow auto-swap, failover & failback between multiple service providers for real non-stop connection. With concurrent LTE modules, it can also allocate bandwidth by " Load Balancing with 8 schemes between multiple WANs.

With one mobile LTE module, 2 SIM card slots, IMR-3002 provides redundant link between two service providers.

Both GPS and Russian GLONASS systems are supported.

Optional EMMC Flash storage*

The optional EMMC flash storage on router can offer 8G/16G/32G capacity.

Load Balancing with 5 mechanisms for multi-WANs

IMR-3002 supports Load Balancing for LTE/WAN connections. There are five schemes for Load Balancing function:

Pack	Algorithm	Description
Basic	Fixed	Manually route by traffic type through fixed WAN link.
	Failover	Routes connections through preferred WAN link while others stand-by. Sequentially activate another link if preferred link fail occurs. Once failover will not failback until link loss.
	Priority	Routes connections through preferred WAN link as primary while others follow by. Ex. Wi-Fi client>LTE>others
	Weighted Round-	Evenly distribute the traffic over all working WAN links in circular order

	Robin	according to the specified weights.
	Custom Route	Routing through the selected WAN for each specific traffic, ex: TCP/UDP port number and IP address.

2 port serial connection, Modbus gateway

It builds in 2 port serial connection for RS232, RS422, RS485. (for RJ45 model only)

The built-in Modbus gateway can convert Modbus RTU/ASCII to Modbus TCP for device control.

VPN and firewall

Besides traditional VPN peer to peer tunneling, IMR-3002 support latest Multi-Site VPN function that is an efficient way for mesh tunneling. The registration is under cloud service and encrypted by SSH makes the connection easy and safe.

It supports Multi-Site VPN, OpenVPN, L2TP over IPsec, IPsec, L2 over GRE, IPGRE, and NAT for various VPN applications.

The built-in Layer-4 firewall includes DDoS, IP address filter / Mac address filter / TCP / UDP port number.

Email notice; Event log; Remote Web control

In case of events, the IMR-3002 will immediately send email and trap.

When the router is at remote area with limited access, Web control can help to get router status or remotely reboot.

Built-in 2 port Gigabit Ethernet

Two port Gigabit Ethernet can be supported as 1LAN+1WAN or 2LAN models.

USB port for back up, restore configuration and upgrade firmware; Dual image firmware

The built-in USB port can upload/download the configuration through USB dongle for router replacement.

It supports dual-image firmware to choose which one to start.

Ignition Sensing

Ignition sense allows you to delay power off the router with a designated time delay. (-IGN model)

24V input voltage selection: dual 9V-56VDC (24V model) or dual 9V-36VDC (24V-IGN model)

The IMR-3002 is able to work from 9VDC to 56VDC (24V model) or dual 9V-36VDC (24V-IGN model).

Ruggedized industrial design and FCC, CE certificate

The IMR-3002 is designed to meet with outdoor network environment with IP30 (IP43 for M12 model) housing. It passed serious tests under extensive Industrial EMI and environmental vibration and shocks standards. With CE & FCC radio certification for LTE, the IMR-3002 is best for outdoor community, vehicle, and process control automation applications.

For more usage flexibilities, IMR-3003 supports wide operating temperature from -40°C to 65°C.

EN50155, EN61373 verification; E-marking** certification; ITxPT** design

The IMR-3002 series is also applicable for railway on-board/track side, vehicle and mining applications for more usage flexibilities. The series is verified with EN50155, EN61373, and EN45545 for railway applications (Except 24V-IGN model). The E-marking certificate (24V model) and ITxPT design (24V-IGN model).
