VKF20

THERMOFORMING MACHINES

Technical characteristics

Length	3900
Width	1130
Height	1930
Loading area	min. 2 free step
Lower film web	322 -422
Max forming depth	120
Lower film reel diameter	300
Upper film reel diameter	250
Reel core diameter	3" (76mm)
Maximum pitch	320
Internal pump	Up to 300 m3/h
Installed power supply (pump excluded)	7,5 Kw (F421 P320)
Compressed air pressure	6 ÷ 7 bar
Compressed air consumption (according to the equipment)	1150 NI / min (P320 - H120 - 7 cycle/min)
Water consumption	150 lt/h

Why you should choose it

The VKF20 is the perfect thermoforming packaging machine for growing companies looking for a flexible, efficient and user-friendly solution. With a compact yet high-performance design, this machine can adapt to different production requirements, offering precise and reliable packaging.

Thanks to its advanced technology, the VKF20 ensures material optimisation and waste reduction, improving operational efficiency. The intuitive control panel allows quick and easy program, reducing set-up time and increasing productivity.

Reliable and built with high quality materials, the VKF20 is a strategic choice for those who want to combine high performance and ease integration into their production line.
