THERMOFORMING MACHINES

Technical Specifications

Machine length - width - height	2350 mm - 1000 mm - 1690 mm
Width	422 mm
Steps	Up to 320 mm
Forming height	80 mm standard & 120 mm (opzional)
Possible formats	1.1 - 1.2 - 2.1 - 2.2 - 3.1 - 3.2 - 4.1 - 4.2 - 5.1 - 5.2 - 6.1 - 6.2
Vacuum pump	Internal Busch 100 m³/h
Productivity	6–7 cycles/min (Productivity may vary depending on the configuration and application)
Type of packaging	Flexible vacuum film & MAP

1.1 1.2 2.1 2.2 3.1 3.2 4.1 4.2 5.1 5.2 6.1 6.2

Why you should choose it

The VKF 5 is the entry-level solution in the Veripack range, designed to bring industrial packaging quality to production environments with limited output volumes or restricted operating space. With a footprint of just over 2 metres, it fits easily into virtually any production layout, making it the ideal choice for laboratories, craft production facilities and companies looking to move towards automation without requiring extensive floor space.

Despite its compact dimensions, the machine ensures maximum operational flexibility when handling small and medium-sized batches and carrying out format changes. It can be equipped with a wheel kit for easy movement around the production facility, as well as an inkjet printing system, which allows batch numbers, expiry dates and barcodes to be printed directly onto the packaging. This ensures full traceability while eliminating the need for a dedicated labelling machine.
