

Stop Drowning in ESG Noise. Start Leading with Intelligence.

The future of sustainability is AI-powered, real-time, and actionable. Most companies are stuck in an expensive cycle of ESG reporting chaos—juggling spreadsheets, third-party tools, and consultants to stay on task. But when customers, investors, or regulators come calling, companies are not prepared to deliver the data. The result? Missed opportunities, wasted time, and a constant state of flux.

Liminal Omni-1 is built to break that cycle. It's a unified platform that brings together your sustainability data—from carbon accounting to stakeholder disclosures—and transforms it into actionable business intelligence. No more fragmentation. No more guesswork. Think fast, reliable insights that keep your data-diving efforts afloat.

With Liminal, companies can align with leading frameworks like CDP, Ecovadis, and CSRD, while uncovering risks and opportunities often sunken within data. Our customers get the visibility and confidence to move from reactive compliance to proactive strategy—growing your business while meeting every stakeholder expectation with clarity and precision.

Whether you're building your first emissions inventory or scaling a global ESG program, Liminal helps you turn sustainability from a reporting burden into a real competitive advantage.

Navigate Uncertainty With Real-Time Sustainable Intelligence

Performance Insights that Drive Results

- Approach sustainability with rigor—streamline responses to government mandates and customer requests effectively and efficiently.
- Engage your executive teams with engaging visualizations and thoughtful data-driven narratives.

Move from Reporting to Real-Time

- Analyze ESG and sustainability performance in real-time—no spreadsheets, no guesswork.
- Avoid unnecessary expenses with data-driven AI Insights to supplement your sustainability and data expertise and coordinate across teams.

Improve Business Outcomes

- Align sustainability with business strategy—move from cost center to revenue driver.
- Leverage your ESG data to identify risks and opportunities to improve stakeholder confidence.

Schedule a demo today to learn how our sustainable business intelligence platform can help you turn your sustainability data into business outcomes.

Confidently Prepare and Streamline ESG Reporting
