- **Diets high in Ultra Processed Foods raise heart disease risk by 47%.**

Latest Announcements

[Full Press Release](#)

Innovations Inc., has partnered with Commission Wolf to recruit independent sales representatives focusing on U.S. cardiology practices.

This aims to accelerate commercialization of the company's MaxYield™ and CardioYield™ AI-driven cardiac diagnostic platforms, ensuring market readiness alongside ongoing FDA clearance processes.

NeuralCloud Solutions has signed a non-binding agreement with Movesense to pilot AI-powered ECG and Holter reporting solutions.

The collaboration will deploy MaxYield and CardioYield software platforms with Movesense wearable sensors in third-party health systems, aiming to enhance ECG capacity and reporting efficiency.

NeuralCloud Solutions has partnered with Intelimed, appointing them as exclusive distributor in Chile and non-exclusive across Latin America for their cardiac AI software platforms.

The agreement will enhance regional access to Neural Cloud's MaxYield, CardioYield, and Insight360™ technologies, targeting hospitals, clinics, OEMs, and telemedicine providers.

Industry Watch

Global Wearable Technology market grows from USD 92.90B (2025) to USD 229.97B (2033) at 12.1% CAGR.

Wearable tech is quietly reshaping how we monitor and manage health. Wrist-wear commands 51.4% revenue share. North America leads with over 33.0% of global revenue. Health monitoring features drive adoption and retention. Emerging innovations include neural gesture control and advanced sensors.

Must-Reads & Featured Articles

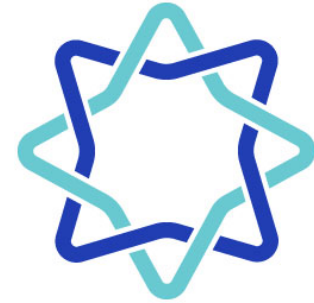

Recent Study: 60% of adult diets are ultra-processed foods (UPFs), raising heart disease risk by 47%!

These foods trigger chronic inflammation, increasing stroke incidence and metabolic syndrome markers. Clinical evidence shows replacing UPFs with whole foods significantly improves cardiovascular outcomes.

About AI/ML Innovations Inc. (CSE: AIML | OTCQB: AIMLF | FWB:42FB)

AIML deploys advanced AI and neural-network signal-processing to turn noisy biometric data- starting with ECG - into diagnostic-grade insight. Our flagship MaxYield™ platform, now in FDA 510(k) review, powers wearables and remote-monitoring systems worldwide. With recent advisory appointments, AIML is scaling validated, cloud-based ECG clarity for global healthcare.
