**TIMBER PRODUCTS LTD**

## What is MiniCLT ?

MiniCLT is a small format Cross Laminated Timber panel developed using high performance European glue technology. CLT provides strength by gluing three (or more) layers of timber, with the middle layer at right angles to the outer layers. This CLT panel has enormous rigidity, strength and dimensional stability transforming the individual boards into a versatile building product.

For modular construction, the panels are designed to be lightweight and due to the cross lamination can take screw fixings without predrilling for easy assembly.

**Ready. Set. Fence.**

# Timber Fencing.

**Neighbour Friendly**  
**Engineered Wood**  
**Screw Fixed & Demountable**  
**Bandsawn Natural Look**

---

Using tongue and groove assembly, our fencing solutions are designed to be high-performing, durable and a practical alternative to traditional timber paling fences.

Design for Manufacture Assembly (DFMA) means the components are prefabricated for less cutting waste and ease of assembly on site. Utilising the principles of DFMA we have designed our fencing components to be used in both horizontal or vertical installation.

## Construction Options

### Traditional Timber.

#### Classic - Horizontal or Vertical.

Using Mini Cross Laminated Timber (MiniCLT) we have designed innovative and versatile solid wood fencing solutions. Our horizontal and vertical systems offer personalised, functional design.

# Contemporary Steel.

## EasyWall - Horizontal or Vertical.

EasyWall combines the strength of steel posts and rails with the natural beauty of cross-laminated timber planks. Quick and easy to install. EasyWall will add great value to your home.

**Classic Horizontal**

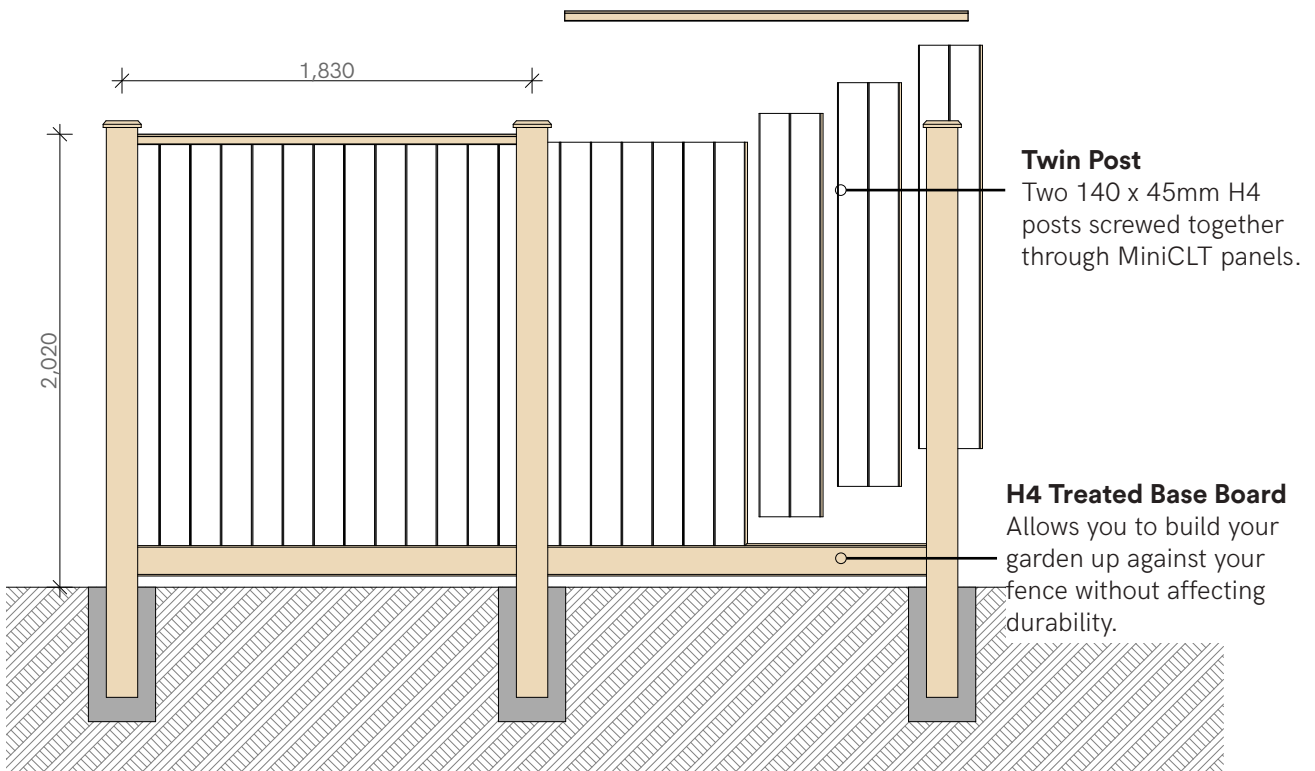

**Classic Vertical**

<b>Height Options</b>	<b>7x Panels</b>	2.150m	<b>Post Spacing</b>	1.830m
	<b>6x Panels</b>	1.875m		
<i>With 135mm base board and 50mm gap to ground.</i>	<b>5x Panels</b>	1.600m		
	<b>4x Panels</b>	1.325m		

<b>Height Options</b>	<b>Post Spacing</b>	1.830m
2.020m - Can be cut lower to suit.		
<i>With full panel, 135mm base board and 50mm gap to ground.</i>

# Components

While our multi-use products have been carefully designed and manufactured to suit our unique systems, they are also ideal for general landscaping and DIY projects.

**Enquire at your local timber merchant.**

## MiniCLT Panel

<b>Supplier Item No.</b>	1952003020
<b>Product Dimensions</b>	275 x 30 x 1800mm
<b>Treatment</b>	H3.2 MicroPro (MCA)

**Multi-Use** Fencing, outdoor structures, shelving + general DIY

## Timber Post

<b>Supplier Item No.</b>	1954004020/30/40/50/60
<b>Product Dimensions</b>	140 x 45 x 2100mm (length variations) 2400 / 2700 / 3000 / 3600mm
<b>Treatment</b>	Lifewood H4 (CCA)

## Laminated Post Caps

<b>Supplier Item No.</b>	1953004058/59
<b>Product Dimensions</b>	170 x 30 x 135mm
<b>Treatment</b>	H3.2 MicroPro (MCA)

## T & G Baseboard

<b>Supplier Item No.</b>	1954003010
<b>Product Dimensions</b>	135 x 30 x 1800mm
<b>Treatment</b>	Lifewood H4 (CCA)

**Multi-Use** Retaining, garden edging, general landscaping

## EasyWall Post & Rail Kits

Fentec - Call 0800 002 725  
Steel post and rail kits for EasyWall fencing.  
Various heights available.

## Post Block

**Supplier Item No.** 1954003030  
**Product Dimensions** 120 x 30 x 450mm  
**Treatment** H4 Lifewood (CCA)

---

## Capping Rail

**Supplier Item No.** 1953004017  
**Product Dimensions** 88 x 45 x 1800mm  
**Treatment** H3.2 MicroPro (MCA)

---

## Infill

**Supplier Item No.** 1953004047  
**Product Dimensions** 40 x 30 x 2000mm  
**Treatment** H3.2 MicroPro (MCA)

# Laminata

Made in Northland NZ.

# MT POKAKA

# Ready. Set. Build.

# Create your Own.

MiniCLT panels are perfect for outdoor projects around the home.

- **Garden Sheds**
- **Firewood Storage**
- **Garage Storage Shelving**
- **Gazeboos and shelters**

---

MiniCLT panels are easily screw-fixed together allowing construction of garden sheds and other outdoor structures. Let your creative juices flow and build your own garden shed that the whole family can get involved with.

The MicroPro H3.2 MCA Environmentally Preferable treatment makes it ideal for outdoor structures. Take care to use damp-proofing between soil and the panel and use only H4 treated timber where ground contact may occur.

# Ready. Set. Finish.

While our products are designed to be robust and durable, we do suggest appropriate aftercare.

This will enhance the timber's natural beauty and increase longevity.

---

## Surface Checking.

Timber is a natural product and no two pieces are the same. After installation and when the timber has been exposed to the sun, wind and/or rain, the occurrence of 'checking' (or small splits) on the surface of the paling is a normal and natural releasing of tension in the timber.

## Storage & Handling.

- Kiln-dried MCA treated timber should be stored out of the weather.
- We recommend storing inside a warehouse or leaving the protective wrap on until product is used.

## Paint and Protect.

To protect your new fence, shed or gate, we recommend coating it with a water based fence stain. Ensure the stain is designed to rejuvenate and transform the colour of exterior timber, delivering a more durable and attractive result.

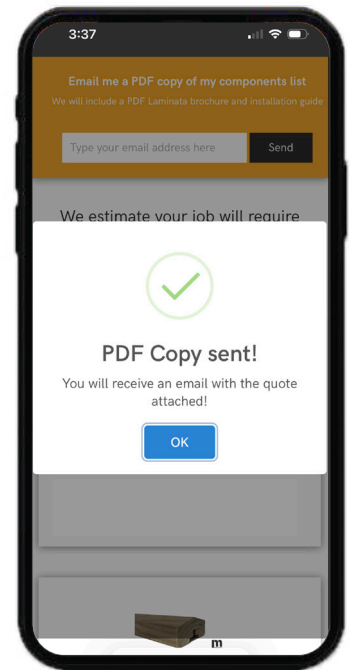

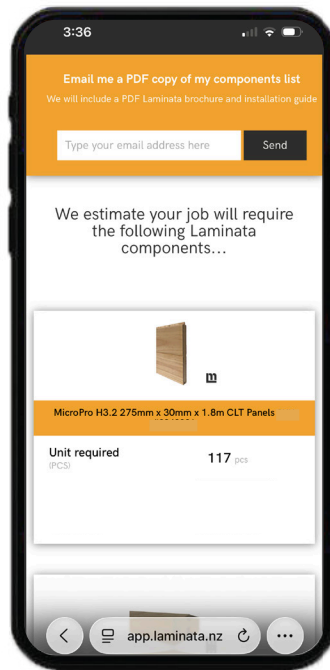

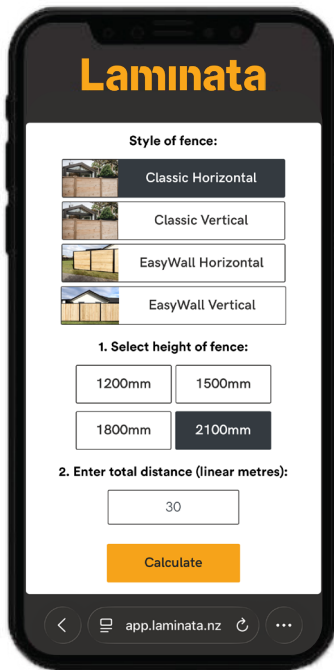

## Our Commitment.

We at Laminata Outdoor Ltd. are passionate about the benefits of MicroPro (MCA) treated MiniCLT.

We believe we are challenging conventional construction methods with products that are DIY-friendly. We are continually innovating and bringing to the market new and better ways to build with wood.
