

# Laminata

## PINELINE

Engineered timber lining solution for interior wall and ceiling applications.  
Manufactured in New Zealand using sustainably sourced pine.

MADE IN  
**NZ**

## PINELINE Interior Lining Panel

Designed for rapid installation and solid wood finishes. Pinline combines the warmth of natural timber with the efficiency of modern engineered construction systems. Machined with end-matched tongue and groove, to allow joining without the need for a stud.

Ideal for residential, modular, and prefabricated building applications where speed, quality, and performance matter.

### TECHNICAL SPECIFICATIONS

|                 |                                 |
|-----------------|---------------------------------|
| Product Code    | 1952002510                      |
| Panel Thickness | 21mm                            |
| Panel Width     | 265mm                           |
| Panel Length    | 1800mm                          |
| Profile         | TG&V (Tongue, Groove & V-Joint) |
| Material        | Cross Laminated Pine            |
| Application     | Interior Use                    |
| Finish          | Brushed                         |
| Span Capability | Up to 600mm Centres*            |

**FAST  
INSTALLATION**

### PROFILE & INSTALLATION

Precision-machined tongue and groove profile enables seamless installation and concealed joining, delivering a clean, high-quality finish with secret fixing.

Engineered to span up to 600mm stud centres without requiring intermediate support, streamlining installation and reducing construction time.

Suitable for fixing across timber or steel framing systems using standard nails or screws.

**END MATCHED**

### MANUFACTURED IN NEW ZEALAND

Supporting local industry,  
communities and  
sustainable forestry.
