PINEBUILD Interior Project Plank

Designed as a versatile square-edged indoor timber plank, Pine Build is made for practical interior construction and project work where flexibility, ease of handling, and a clean finished result matter.

Ideal for shelving, cupboards, cabinetry-style builds, furniture, storage solutions, interior joinery projects, and a wide range of general indoor applications.

PROFILE & INSTALLATION

Square-edged profile gives builders, joiners, and makers more flexibility across custom indoor projects where tongue and groove is not required.

Easy to cut, handle, and work into shelving, cabinetry, furniture pieces, storage units, and fit-out. A great all-purpose plank to have at the ready.

Best suited to dry internal environments and project applications for appearance, versatility, and ease of use.
