

Wish Hats for Wishes 2026

WE ARE PROUD TO SUPPORT A WISH COME TRUE

DONATE

Dominic - 3 years old from Swansea, MA

Illness: Immune Disease - Hypogammaglobulinemia

Dominic is a feisty, fun-loving three-year-old who has been a fighter since before he was born. Diagnosed with fetal growth restriction in the womb, he spent his first days in the NICU. As he grew, he experienced frequent infections, something his mom recognized from her older son's journey. Genetic testing later confirmed Dominic has a rare immune disease called congenital hypogammaglobulinemia. Dominic is often in and out of the hospital and sick more often than not, but that never dulls his joyful spirit. He loves Buzz Lightyear, Woody, and Lightning McQueen, and when no one's looking, he'll sneak off with his brother's Nintendo Switch to race in Mario Kart.

Dominic's magical wish is to stay at Give Kids The World and visit the Disney, Universal, and Seaworld Parks!

Oliver - 3 years old from Somerset, MA

Illness: Congenital Cardiac Malformation

Oliver was born with a rare congenital heart condition that required open-heart surgery immediately after birth. At just three years old, he has already undergone two additional surgeries and will need more in the future. He has a pacemaker and is currently on the transplant list, yet continues to face each day with remarkable strength. Despite his medical challenges, Oliver is an energetic and joyful little boy who loves puppies, cars, and dinosaurs. He enjoys swimming and playing at the playground with his sister, where his bright smile shines the most.

Oliver's magical wish is to stay at Give Kids The World and visit the Disney, Universal, and Seaworld Parks!

Help us raise funds to support Dominic and Oliver and other Wish Kids like them.
