ENCOURAGING WORDS
Who Do You Resemble? One of the things I enjoy most about Facebook is seeing pictures of kids, especially pictures of kids whose parents I knew when they were children. It's enjoyable to see the eyes and smiles on the faces of children that look exactly like the eyes and smiles from twenty or thirty years ago. What makes children resemble their parents so much? That is not a hard question to answer. Let's summarize it in this way: "When children look like their parents on the inside, they'll look like their parents on the outside." The genetic makeup of children comes directly from their parents. The DNA code for the hair color, the eye color, the facial features, etc. all come from the father and the mother. A child's DNA on the inside is what determines how they look on the outside. That is why they look like their parents. Let's make a broader and more significant application of this principle. If a human's outward characteristics are a reflection of inward genetic qualities, where do a Christian's outward characteristics originate? If you see a Christian who is humble, servant-hearted and eager to do good unto others, is that not a reflection of an inward "genetic code"? If you see a Christian who is sacrificial, selfless and profusely generous with time, abilities and finances, is that not an outward manifestation of an inward condition? Consider the Scriptural perspective on this. Paul said, <i>"I have been crucified with Christ; it is no longer I who live, but Christ lives in me; and the life which I now live in the flesh I live by faith in the Son of God."</i> (Gal. 2:20). The fact that Christ is "in me" directly affects how I live "on the outside" When the world looks at you, do they see the "family resemblance"? Do they see your Father in you? Do they see your Older Brother in you? Who do they say you look like?
