

WHAT IS REGENEXX?

Regenexx is an innovative treatment for orthopedic injuries that enhances your body's natural healing processes. To treat damaged tendons, ligaments, muscle, bone, and cartilage, our physicians draw your blood platelets and bone marrow aspirate and process them in our advanced orthobiologics laboratories. We then inject them precisely at the site of your injury using image guidance. Regenexx procedures provide a lower-risk, lower-cost, minimally invasive alternative for up to 70 percent of elective orthopedic surgeries.

THE REGENEXX DIFFERENCE

Regenexx is a nonsurgical outpatient procedure performed either in a single day or in a series of three treatments over two weeks. Most patients are encouraged to return to activity within a week of their procedure. Patients with health factors such as heart issues or risk of stroke can find a safer alternative to surgery with Regenexx.

YOUR REGENEXX BENEFIT

Regenexx is covered as an in-network benefit within the IAFF Health & Wellness Trust health plans, imaging is done by the Regence BlueShield network locally and the National BlueCard PPO network outside the Regence service area.

In-network benefits for specialist services within your plan and in-network co-pays, deductibles, and out-of-pocket maximums apply for all Regenexx services.

Non-Regenexx services may fall under a different benefit level, and may or may not be treated as in-network.

CONDITIONS TREATED

Ankle/Foot

- Achilles tendinopathy
- Arthritis
- Bunions
- Instability
- Ligament sprain or tear
- Plantar fasciitis

Hand/Wrist/Elbow

- Arthritis
- Carpal tunnel
- CMC joint arthritis (thumb)
- Tennis elbow
- Trigger finger
- Ulnar nerve entrapment

Hip

- Arthritis
- Bursitis Labral/labrum tear
- Joint-replacement alternative
- Osteonecrosis
- Tendinopathy

Knee

- Arthritis
- Joint-replacement alternative
- Meniscus tear
- Sprain or tear of ACL/PCL
- Sprain or tear of the MCL/LCL
- Tendinopathy

Shoulder

- Arthritis
- Joint-replacement alternative
- Labral tear
- Rotator cuff tear
- Rotator cuff tendinosis

Spine

- Back or neck nerve pain
- Bulging, collapsed, or herniated disc
- Ruptured or torn disc
- Degenerative disc disease
- Disc extrusion
- Disc protrusion
