flexGRIP[®] Neo.

Umbilical

FlexGRIP Neo. Umbilical uniquely secures umbilical vessel catheters quickly and reliably, assuring proper positioning while preventing migration and dislodgement. Utilizing FlexGRIP's skin-safe zinc oxide adhesive, this device provides unrivaled mechanical stabilization of the catheter in all neonatal environments.

Zinc oxide

- Zinc oxide is specifically selected to be gentle on the neonate skin.
- Designed to prevent MARSII
- Reliable, skin-safe adhesion, even in high humidity incubators

* data on file
