
Mayra Roa

University of Florida
Mathematics | UFTeach

Dear Parents and Caregivers,

My name is Mayra Roa, and I am excited to introduce myself as a mathematics teaching intern working alongside Mrs. Walsh this semester. I am currently pursuing a degree in Mathematics with a minor in UFTeach at the University of Florida. Through UFTeach, I have had the opportunity to gain classroom experience and develop my skills as a future educator.

I was born and raised in Colombia and moved to Florida when I was eight years old. Growing up between two cultures has given me an appreciation for the different experiences and perspectives that students bring into the classroom. I believe teachers are not only educators but also mentors and guides. My goal is to create a supportive classroom where students feel comfortable asking questions, working with others, making mistakes, and growing from those experiences. I hope to help students develop both their mathematical skills and their confidence as learners.

After completing my degree and internship, I plan to become a high school mathematics teacher. In the future, I hope to earn a master's degree and potentially work in higher education or within a school district.

I look forward to getting to know your students and being part of their learning experience this semester. If you have any questions, please contact Mrs. Walsh at walshkl@alachuaschools.net

Sincerely,

Ms. Mayra
