

# Delousing System Hydrolicer DS

Delousing system designed for effective and gentle treatment against lice

Based on extensive operational experience from over 230 delivered lines, we have developed Hydrolicer DS - the next generation delousing technology. The system builds on the most important principles of Hydrolicer, but adds a number of innovations that ensure even higher capacity and increased efficiency - while ensuring fish welfare to the utmost. The DS system is the result of several years of targeted development, where we now set a new standard for gentle, effective and flexible delousing.

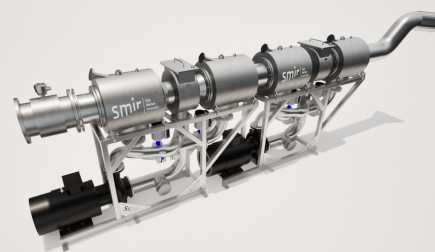

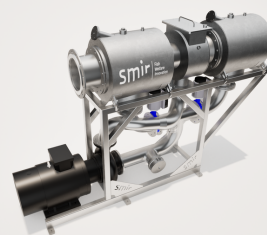

## Key advantages

- ✓ Higher treatment capacity
- ✓ Increased delousing effect
- ✓ Reduced power consumption
- ✓ No unwanted blockages
- ✓ Suitable for both larger and smaller vessels

## Key features

- ✓ Precise fish counting with AI
- ✓ New and improved flushing chamber
- ✓ Replaceable flushing brackets
- ✓ Automated control system

Hydrolicer DS can be integrated into existing Hydrolicer systems without extensive rebuilding.
