

Oxygen Diffuser

Even distribution of oxygenated water in fish pens

Oxygen Diffuser is a unit that ensures uniform distribution of oxygenated water. The solution is particularly suited for operations where oxygen levels in the sea may become critical, such as during fish crowding. The diffuser is compatible with most oxygen systems currently used on vessels, making it easy to integrate with existing equipment.

The Oxygen Diffuser is constructed in stainless steel with a hygienic design for easy cleaning and long service life. The robust construction ensures reliable operation even under demanding weather conditions, while the lifting eye enables safe and efficient handling with a crane.

Key advantages

- ✓ Ensures efficient oxygen supply during fish crowding
- ✓ Compatible with most oxygen systems in use today
- ✓ Long service life
- ✓ Easy cleaning
- ✓ Safe and easy handling

Technical specifications

- ✓ **Weight:** 250 kg
- ✓ **Height:** 845 mm
- ✓ **Width:** 406 mm
- ✓ **Connection:** 4" Camlock with hose end

Unit size and flushing pattern can be customized to meet specific needs
