Drum Filter
Smirfilter

Robust drum filter for efficient water treatment in aquaculture

The drum filter from Smir is a robust filtration solution developed for efficient water treatment in aquaculture. With a hygienic design in stainless steel, the filter offers high technical quality and is well suited for use in demanding operating environments.
The design ensures easy access for inspection, maintenance, cleaning, and disinfection. The drum filter can also be delivered with an automatic cleaning system that significantly reduces washing time.
The filter is available in both open and closed configurations and can be adapted to different capacity and filtration requirements. The solution can be installed in several aquaculture applications, including land-based fish farms, processing plants, well boats, and in connection with delousing operations.

Key advantages

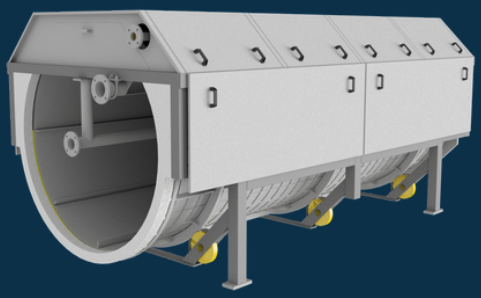

- Robust solution with high technical quality
- Easy access for inspection, maintenance, cleaning, and disinfection
- Available with an automatic cleaning system
- Suitable for a wide range of aquaculture applications
- Long service life

Protection

The drum filter is equipped with the following protection:

- Removable top covers
- Removable side covers
- Front cover with removable hatch
- Rear covers
- Removable covers around the sprockets and chain

The drum filter from Smir can be delivered to meet different capacity and filtration requirments
