Oil, gas and mining fleet management

Manage your vehicle assets, equipment and workers across multiple job sites in remote locations.

Actionable data to keep you in production

With multiple job sites in remote, difficult-to-reach locations, keeping track of crew and assets can be challenging. Geotab helps you track and manage your vehicles and equipment while keeping your drivers safe by providing key data insights to maximise uptime and reduce crashes.

Track your heavy equipment, powered trailers and assets with the IP68 and IP69K rated GO9 RUGGED™ ruggedized telematics device for harsh conditions or external installation.

Having eyes on your equipment from afar takes the guesswork out of your operation — you'll be able to:

Monitor health   Monitor location   Monitor performance of all your assets

Reduce unplanned downtime, with proactive maintenance. Just 1% of unplanned downtime could cost your organisation as much as $5.037 million each year.*

*The Kimberlite study

Geotab, a world leader in capturing vehicle data for fleets of all sizes and types, offers an innovative and comprehensive connected vehicle solution for oil, gas and mining vehicles that can adapt to your ever-evolving operational needs. Here are some of the key facts about Geotab:

- Geotab partners with leading medium- and heavy-duty OEMs, including Ford and GM, to collect data from the vehicles directly

- You can see all of your vehicle and equipment assets on a single dashboard in real-time

- Geotab's best-in-class safety reporting will help improve your drivers' safety profiles with audible in-cab alerts, customised score cards, and more

Geotab Marketplace

Unlike out-of-the box, one size fits all solutions, the Geotab solution is customisable and scalable, based on an open-platform designed for integration. With unlimited flexibility, the Geotab solution easily adapts to every fleet's needs. With Geotab's Marketplace partners, these data insights can be integrated with MyGeotab in a convenient dashboard.

- **Mobile Forms**

- **Cameras & ADAS**

- **Asset Trackers**

- **Lone worker solutions from NOVA**

- **GIS solutions**

Geotab's open-platform enables businesses to integrate other industry solutions:

Mobile Forms
- Work order management
- Replace paper forms

GIS Solutions
- Advanced mapping and spatial analytics

Camera & ADAS
- In-cabin, road facing and/or auxiliary
- Live video, or snap-shots

Geotab GO Device
- Vehicle tracking
- Easy installation
- Connect via OEM Data Platform

Asset Tracker
- Track movable assets
- Containers, trailers, generators
- Battery-power, solar-power and Bluetooth

MyGeotab
- Fleet management software
- Web-based
- Customisable with a Software Development Kit
