Why fleets choose this

Get visibility without complexity

- > Know where vehicles are and how they're used
- > Identify idling, faults and inefficiencies
- > Replace manual tracking and spreadsheets
- > Turn data into actions inside tools your team already uses

What Zetifi uniquely delivers

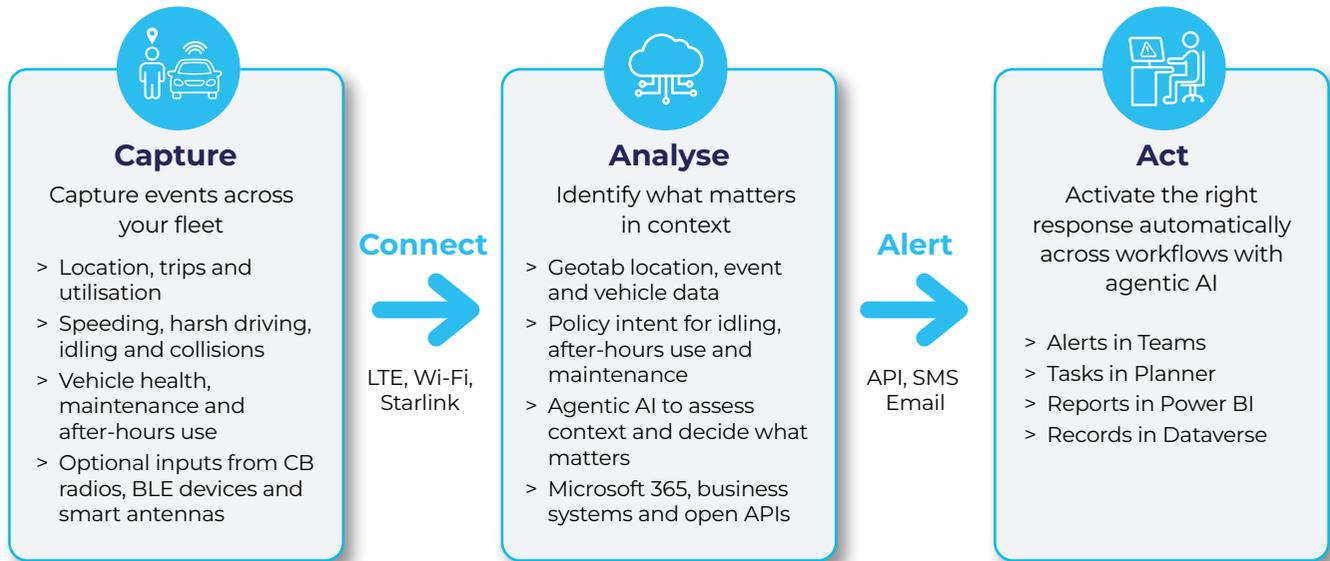

Turn insights into action automatically

- > Convert events into tasks, alerts and workflows in Microsoft 365
- > Turn telematics data into policy controls for idling, after-hours use and maintenance
- > Embed fleet management into MS Teams, Planner and Power BI
- > Zetifi team provides ongoing support and optimisation

Turn fleet events into workflows, alerts, tasks and records where your team already works.

HOW IT WORKS: FROM EVENT TO ACTION IN MINUTES

GO9 captures vehicle and driver data. MyGeotab turns that data into events and reports. Zetifi then maps those events to your operating rules and automatically delivers the right alerts, tasks, records, and summaries into Microsoft 365. Agentic capabilities help interpret your rules and coordinate the appropriate response in line with your organisation's policies.

Not just telematics. Not just alerts.
A complete path from event to context to automatic action

WHAT YOU GET:

Geotab GO9
Telematics Device

MyGeotab
Software

Zetifi
Platform

Microsoft-native
Workflows

Local Setup,
Training & Support

BEST FIT FOR ORGANISATIONS THAT...

- > Run light vehicles, mixed fleets or heavy vehicles
- > Want better workflows for maintenance, fuel, utilisation and exceptions
- > Need practical telematics without a camera-led safety solution
- > Already work heavily in Microsoft 365

NEXT STEP

- > Book a demo tailored to your fleet
- > Run a pilot to prove ROI quickly
- > Need fuller risk context & proof?
Add Connected Fleets Safety for video, real-time driver coaching & integrated safe driving workflows.
