ZETIFI LONE WORKER SAFETY

SAFETY THAT WORKS FOR YOUR BUSINESS

Powered by Zetifi Smart Antenna. Connected to Microsoft 365

For organisations with people working alone, remotely or after hours, Zetifi turns duress alerts, check-ins and location context into fast, structured action. Built on Zetifi Smart Antenna, it turns safety events and policy logic into alerts and actions via Microsoft workflows for safety, not surveillance.

Automated & agentic workflows to capture, analyse, alert and act

Duress alarm	Check-ins	Context-aware tracking	Agentic-ready workflows	Microsoft-native workflows
In-vehicle or out-of-vehicle alerts triggered via UHF radio, phone or button	Location, time and context aware check-ins from app, button or UHF radio	Choose what works for you, always on or privacy first tracking option	Use Microsoft Copilot agents for policy, alert and action workflows	Alerts, lists, reports and evidence in Microsoft Teams, Sharepoint & BI

Why fleets choose this

Improve safety without adding complexity

> Know when a worker may need help

> Reduce manual check-ins & escalations

> Support response in remote and low coverage conditions

> Keep a clear record for review and improvement

What Zetifi uniquely delivers
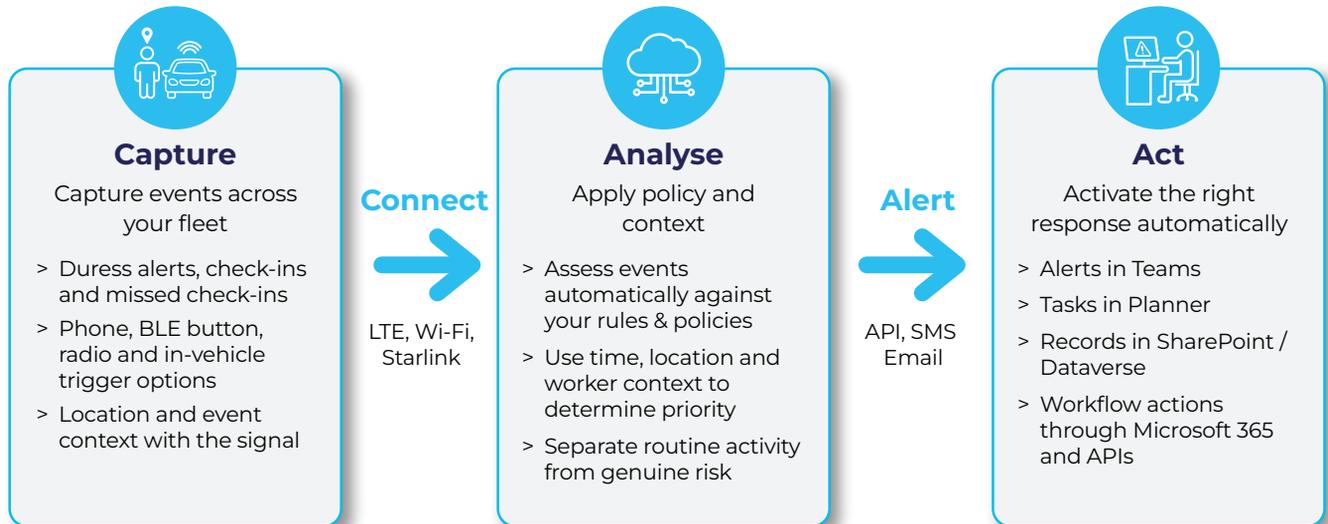

Turn safety events into action automatically

> Capture duress, check-ins and context from the field

> Analyse events automatically against your policies

> Trigger alerts, tasks and records in Microsoft 365

> Tune rules and workflows over time so the system stays relevant

For organisations with people working alone, remotely or after hours.

HOW IT WORKS: FROM EVENTS TO AUTOMATED ACTION IN MOMENTS

Zetifi Lone Worker Safety reduces single points of failure with multiple triggers and connectivity options, plus automation & AI agents to analyse, alert and act.

Capture
Capture events across your fleet

> Duress alerts, check-ins and missed check-ins
> Phone, BLE button, radio and in-vehicle trigger options
> Location and event context with the signal

Connect
LTE, Wi-Fi, Starlink

Analyse
Apply policy and context

> Assess events automatically against your rules & policies
> Use time, location and worker context to determine priority
> Separate routine activity from genuine risk

Alert
API, SMS Email

Act
Activate the right response automatically

> Alerts in Teams
> Tasks in Planner
> Records in SharePoint / Dataverse
> Workflow actions through Microsoft 365 and APIs

Not just alarms. Not just check-ins.
A connected path from events to automated action.

EVERYTHING YOU NEED FOR EFFECTIVE LONE WORKER SAFETY

> Zetifi Smart Antenna Pro
> Field-ready trigger options including BLE buttons & UHF radio integrations
> Policy-driven agentic workflow layer
> Microsoft-native integrations
> Local setup, training and ongoing support

NEXT STEP

> Book a demo tailored to your operations
> Run a short pilot to prove fit quickly

Lone Worker Safety extends Zetifi's connected fleet technology beyond the vehicle and into the field to keep your team safe where they work.
