

Title: Senior Software Engineer

About Us:

We are a technology consultancy based in **San Juan, Puerto Rico**, advising companies from strategic planning to coding. We partner with clients to **co-innovate and create scalable, reliable solutions tailored to their unique needs**.

Our teams are small, diverse, and agile. We are master builders, creators, and hands-on problem-solvers who thrive on solving complex challenges. Coaching and mentoring others is a core value. We believe that helping people grow creates significant value for our clients, our company, and each other.

We accelerate innovation by continually pushing the envelope and adopting **cutting-edge technologies** across artificial intelligence, cloud architecture, big data, DevOps automation, and security. At the same time, we foster a **growth culture** built on:

- Small teams founded on trust and accountability
- Collaboration with client personnel embedded in our project teams
- Open and transparent feedback loops

About the Role:

Senior Software Engineer (Full Stack – .NET/C#, Python/NodeJS)

Location: Colombia (Remote)

Contract: 2 months

Language Requirement: Strong English proficiency

We're hiring **Senior Software Engineers** to join our client's **Integrations Team** for a **2-month contract engagement**. You'll play a key role in building and evolving integrations that power enterprise offerings. From connecting with EMRs to expanding into new services, you'll help shape the foundation that enables a seamless customer experience at scale.

You'll collaborate closely with product, engineering, and enterprise clients to design, implement, and maintain robust integrations, ensuring they are reliable, scalable, and easy to extend.

What You'll Do:

- Design and implement integrations between enterprise platforms and third-party systems, with a focus on EMRs and healthcare/enterprise services.
- Work with **.NET/C#, CQRS patterns**, and **Python/NodeJS**.
- Build and optimize **database solutions** (Postgres preferred).
- Collaborate directly with Enterprise clients to understand integration needs and deliver tailored solutions.
- Contribute to **system design discussions** on scalability, performance, and reliability.
- Participate in **code reviews and technical planning**, ensuring best practices across the integrations stack.
- Help evolve the integrations platform to support upcoming enterprise-scale initiatives.

What We're Looking For:

- Strong experience in **.NET development** with exposure to **CQRS** patterns.
- Hands-on experience with **databases**, ideally **Postgres**.
- Proven background integrating applications with **third-party services** in enterprise contexts.
- Excellent **problem-solving skills** with the ability to diagnose and resolve complex integration issues.
- Strong **communication and collaboration skills** in English, especially when working with enterprise clients.

Bonus Points For:

- Experience with **Wolverine** and **Marten DB**.
- Exposure to frontend development with **React (JavaScript/TypeScript)**.
- Familiarity with **CI/CD pipelines** and modern **DevOps practices**.

Why Join Us:

- Be part of a **high-impact project** with enterprise-scale integrations.
- Collaborate with an **experienced international team** through ZetaMinusOne.
- Gain exposure to **cutting-edge technologies** in enterprise healthcare and beyond.
- Short-term (2-month) engagement with opportunities for future collaboration.
