

Job Title: Data Scientist

Location: Puerto Rico / Hybrid

Job Type: Full-time

## About ZetaMinusOne

ZetaMinusOne is a tech consulting company focused on building smart, scalable solutions through modern software, cloud, and data expertise. We work on cutting-edge projects, value continuous learning, and believe great work happens in an environment that supports both growth and balance.

We are looking for a Data Scientist to join our team and help transform data into meaningful insights, predictive models, and strategic recommendations for internal and client-facing initiatives.

## About the Role

As a Data Scientist at ZetaMinusOne, you will work with cross-functional teams to analyze data, develop models, uncover trends, and support data-driven decision-making. You should be comfortable working with large datasets, applying statistical methods, and communicating findings clearly to both technical and non-technical stakeholders.

This is a great opportunity for someone who enjoys solving complex problems, working with modern tools, and contributing to impactful projects in a collaborative environment.

## Responsibilities

- Collect, clean, and analyze structured and unstructured data from multiple sources
- Build, validate, and improve statistical and machine learning models
- Identify patterns, trends, and opportunities that support business and client goals
- Design and evaluate experiments, including A/B testing and performance analysis
- Create dashboards, reports, and visualizations to communicate insights effectively
- Work closely with engineers, analysts, and stakeholders to translate business needs into data solutions
- Present findings and recommendations in a clear, actionable manner
- Help improve data processes, methodologies, and model performance over time

## Qualifications

- Experience in data science, machine learning, analytics, or a related role
- Strong proficiency in Python and SQL
- Experience with Pandas, NumPy, scikit-learn, and Jupyter Notebooks
- Solid understanding of statistics, regression, hypothesis testing, and experimental design
- Experience with data visualization tools such as Tableau, Power BI, Plotly, Matplotlib, or Seaborn
- Strong analytical, problem-solving, and communication skills
- Ability to explain technical findings to a variety of audiences

#### Preferred Qualifications

- Experience with Spark, PySpark, or Databricks
- Familiarity with TensorFlow, PyTorch, XGBoost, or LightGBM
- Experience with cloud platforms such as AWS, Azure, or GCP
- Familiarity with data warehouses such as Snowflake, BigQuery, or Redshift
- Knowledge of MLOps tools or practices such as MLflow, Docker, Airflow, or CI/CD
- Consulting experience or experience working with multiple clients/projects

#### Why Join ZetaMinusOne?

- Hybrid work environment
- Unlimited PTO
- Certification support
- Mentorship and continuous learning
- Hands-on experience with new technologies
- Growth opportunities
- Inclusive, collaborative culture
- Opportunity to work on cutting-edge projects

#### Apply Now

Join a team that values innovation, growth, and people. If you're passionate about data and excited to solve meaningful problems, we'd love to hear from you.
