

WHAT SHOULD YOU USE TO CLEAN YOUR GUTTERS? YOUR PHONE...

TO CALL FISH WINDOW CLEANING!

- **Did you know clogged gutters can damage your roof?**

A roof is a big investment and keeping it in good condition is so important. Clogged gutters lead to overflowing water which can lead to rot on your roof. Making sure your gutters are regularly cleaned will save you time and money down the road.

- **They can also damage your foundation.**

When gutters overflow and rainwater isn't properly directed away from your home, your foundation could be at risk. Water that pools at the base of your foundation can seep into your basement or crawl space and cause mold to grow. It can also cause cracks in your foundation, leading to costly repairs.

- **We want to keep your home dry and keep you safe!**

500,000 Americans are treated for ladder falls each year. Our team of professionals is extensively trained in ladder safety to ensure that your gutters are clean and you aren't at risk for any injuries!
