ST. MARTIN'S SCHOOL

YEAR

SECURING OUR EDUCATION FACILITIES.

Engineered Security and Access Metalwork
for Schools & Colleges.

About: steelway

Helping schools create safer, more secure and better managed environments through expert guidance and proven solutions.

With extensive experience working across the education sector, Steelway understands the unique challenges faced by schools, academies, colleges and universities.

From perimeter security and access control to safeguarding, site management and compliance our team works closely with education professionals to develop solutions that meet operational needs while enhancing safety and security. By combining technical expertise, high-quality manufacturing and dedicated project support, we help deliver environments that are secure, functional and built to last.

Our View on Sustainability

Sustainability is at the heart of our manufacturing approach.

By prioritising durable designs, efficient processes and responsible material use, we reduce environmental impact while delivering high-quality products built to last.

Green Steel

Offering the strength and durability of traditional steel with a significantly lower environmental impact.

It reduces embodied carbon making it a sustainable choice for modern construction and infrastructure projects.

Our Credentials:

Product Certification -

Construct Product Certifications - EN1090 for CE Marking, Structural Components: EXC 3

Quality Management System -

BSENISO 9001:2015. Certification Body: BSI, Approval No: FM1004

Health & Safety Management System -

BSENISO 45001:2018. Certification Body: BSI, Approval No: OHS89170 (Bilston Road)

Construction Skills Certification Scheme -

Construction Skills Certification Scheme: CSC00303

Contractors Health & Safety Assessment Scheme (CHAS) -

Registration: 00043658

Constructionline -

Constructionline. Product Registration: 46421

Product Certification -

Kitemark Approval to BSEN124. Certification Body:BSI, Approval No: KM56488

Product Certification -

Kitemark Approval to BSEN 15312. Certification Body:BSI, Approval No: KM56488

Nationwide Support

Supply & Install

Thanks to our comprehensive group coverage, we provide a full nationwide installation service. We ensure your metalwork infrastructure is delivered and fitted efficiently, safely and to the highest standards

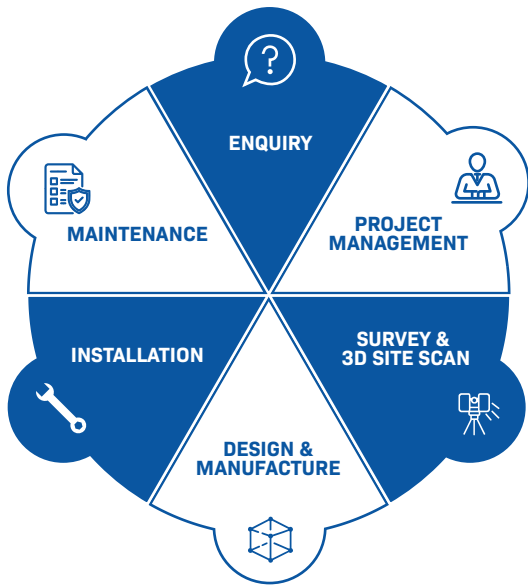

Team DBS Check

For added reassurance our teams are DBS checked, helping to ensure compliance with safeguarding environments when working within educational environments.

Queensgate Works,
Bilston Road, Wolverhampton,
West Midlands,
WV2 2NU

Site Survey

We offer site survey's to ensure that every project is tailored specifically to your needs.

Assistance

We offer assistance with design and planning to streamline your project from start to finish.

Project Management

We provide dedicated project management to ensure every stage runs smoothly and efficiently.

Installation

We offer expert installation services to ensure every project is completed safely, efficiently and to the highest standard.

Technical Support

We provide dedicated technical support to ensure **smooth project execution** and quick issue resolution.

Fast Delivery

We provide **fast, reliable delivery** to keep your projects on schedule.

Quality Assurance

We guarantee **top-quality steelwork** through strict inspections and precision craftsmanship.

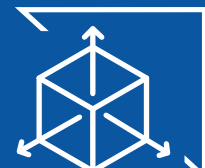

Customer Care

We deliver responsive customer care focused on **clear communication** and lasting client satisfaction.

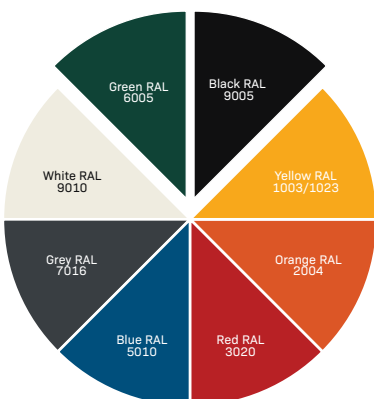

UK Manufactured

We proudly manufacture all our products in the UK, ensuring superior **quality and local craftsmanship**.

Made To Measure

We offer **made-to-measure solutions** tailored precisely to each clients specifications.

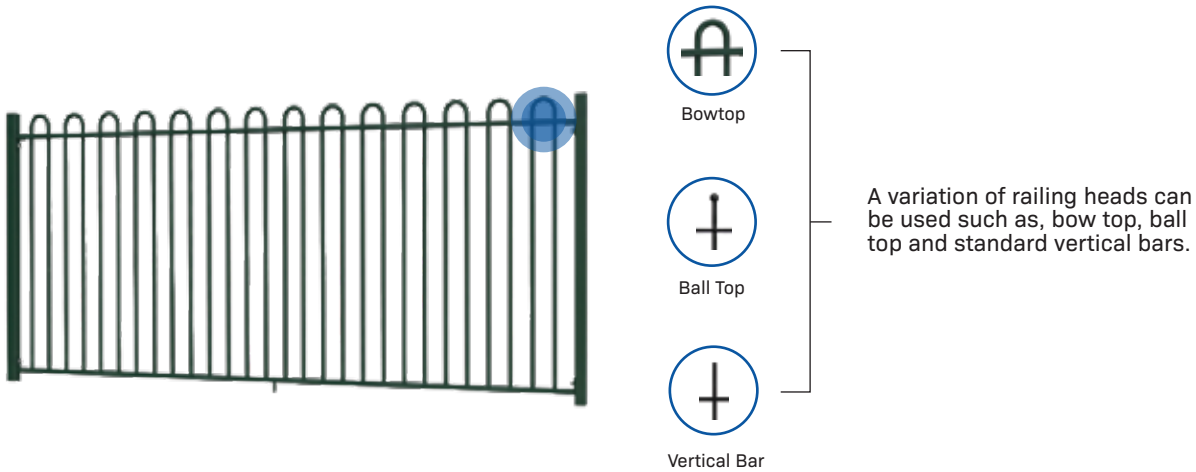

Bespoke Colour Finishes

Match your school branding or specification requirements with a range of colour finishes that provide a durable, high quality finish and long lasting protection.

A range of RAL colours are available to suit project requirements, while selected products can also be supplied with a galvanized finish for long-term corrosion resistance.

Our Products: Vertical & Bowtop Railings

School Fencing Solutions

Our fencing range offers a variety of solutions ideally suited to school environments, from safe and welcoming bow top fencing for playgrounds and pedestrian areas, to durable steel railings and vertical bar systems for perimeter security.

We also provide boundary fencing for enhanced site protection, heritage and estate fencing for more traditional settings and specialist MUGA fencing designed for sports courts and recreational areas. Each system is engineered to site specific dimensions, ensuring strict safety compliance while integrating seamlessly with the school's existing architecture and aesthetic.

Fencing Style Selection

Chose overall design and construction (type of fence) to establish both the visual style and performance of the fencing system.

Bar Configuration

Select arrangement and characteristics of fence bars, influencing both visual appearance and performance of the fencing system.

Fence Head Options

Determine the design of the top section of the fence (bow top, etc), balancing safety, security and aesthetic requirements.

Colour & Finish

Chose the finish and colour treatment to align with branding, durability requirements and the desired visual appearance.

Height Specification

Define the required fence height based on security, safety and environmental considerations.

Gate Configuration

Specify access points to meet operational needs, with gates designed to match your chosen fencing system.

Working Directly with Schools & Approved Contractors

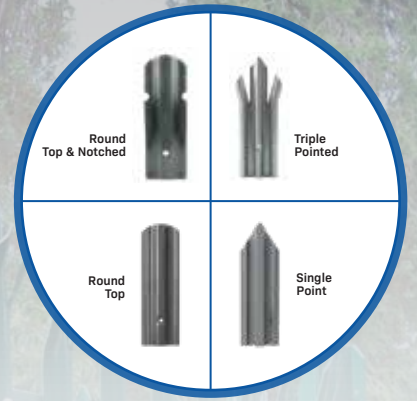

Working in partnership with schools.

Working directly with schools and approved contractors to deliver safe, secure and reliable solutions. From initial design through to installation, we provide expert support to ensure every project meets your specific site requirements.

Available Security Ratings

Providing enhanced protection for times where security is a key consideration.

We can provide a range of independently tested and security-rated solutions to help safeguard school sites. Our team can advise on the most appropriate level of security to meet your specific requirements.

Our range of pale tops

Our Products: Security Fencing

Our Security Fencing

Palisade fencing and gates providing robust perimeter security.

Available in a range of pale profiles and configurations. The system is designed for strength, durability and effective protection against unauthorised access.

Pale Profiles		
	D Pale (2750mm post centres)	W Pale (2750mm post centres)

Our Products: Fire Escapes, Staircases & Emergency Exits

Our Secure Fire Escapes

Providing safe and reliable egress for school buildings.

Steel security fire escapes offer a durable means of emergency evacuation while helping to protect external access points. Designed to meet site-specific requirements, they can be incorporated into school buildings to support safety, compliance and secure access management.

Our Products: Gates

Our Gate Solutions

Safe and secure access tailored to the needs of your school environment.

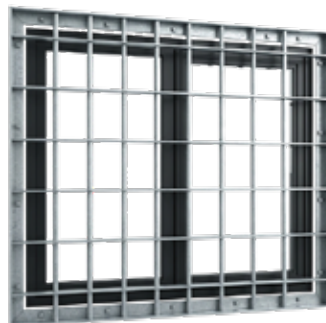

We offer a range of pedestrian and access gate options to integrate seamlessly with existing boundaries or complement new fencing systems, including playground access solutions. Available in matching styles and finished to suit your chosen fencing, each gate can be tailored to meet your site's operational, safety and security requirements.

If you would like to discuss your projects requirements further, contact us by **phone: 01902 451 733** or **email: sales@steelway.co.uk**

Our Products: Grilles & Barsets

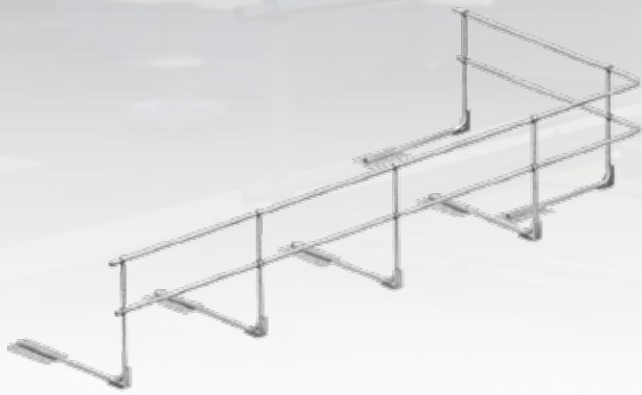

Our Grilles & Barsets

An effective way to enhance security while maintaining the appearance of school buildings.

Our barsets provide an additional layer of protection for vulnerable areas, helping to deter unauthorised access and safeguard school property.

Our Products: Roof Handrails & Access

Our Access Solutions

Helping to protect staff and contractors when accessing rooftop areas.

Fabricated roof handrails deliver robust, permanent edge protection for maintenance and inspection teams. These systems guarantee that schools maintain strict working at height compliance while safeguarding personnel in elevated environments.

If you would like to discuss your projects requirements further, contact us by **phone: 01902 451 733** or **email: sales@steelway.co.uk**

Our Products: CAT Ladders

Our CAT Ladders

Safe and practical access solutions for restricted or elevated areas within school facilities.

Fixed access ladders provide secure access for authorised personnel carrying out maintenance and inspection activities, helping schools safely reach rooftops, plant equipment and other service areas while supporting compliance and site safety.
