

What
Matters
to Me

**ENABLES SUITABLE SERVICES AND
BETTER BUSINESS THROUGH
MEANINGFUL INFORMATION**

THE SOLUTION IS SIMPLE AND MULTI-PURPOSED

Meaningful
information is easily
collected for different
use cases.

What
Matters
to **Me**

Information is provided
in a way that fits the
service provider's
process and is useful.

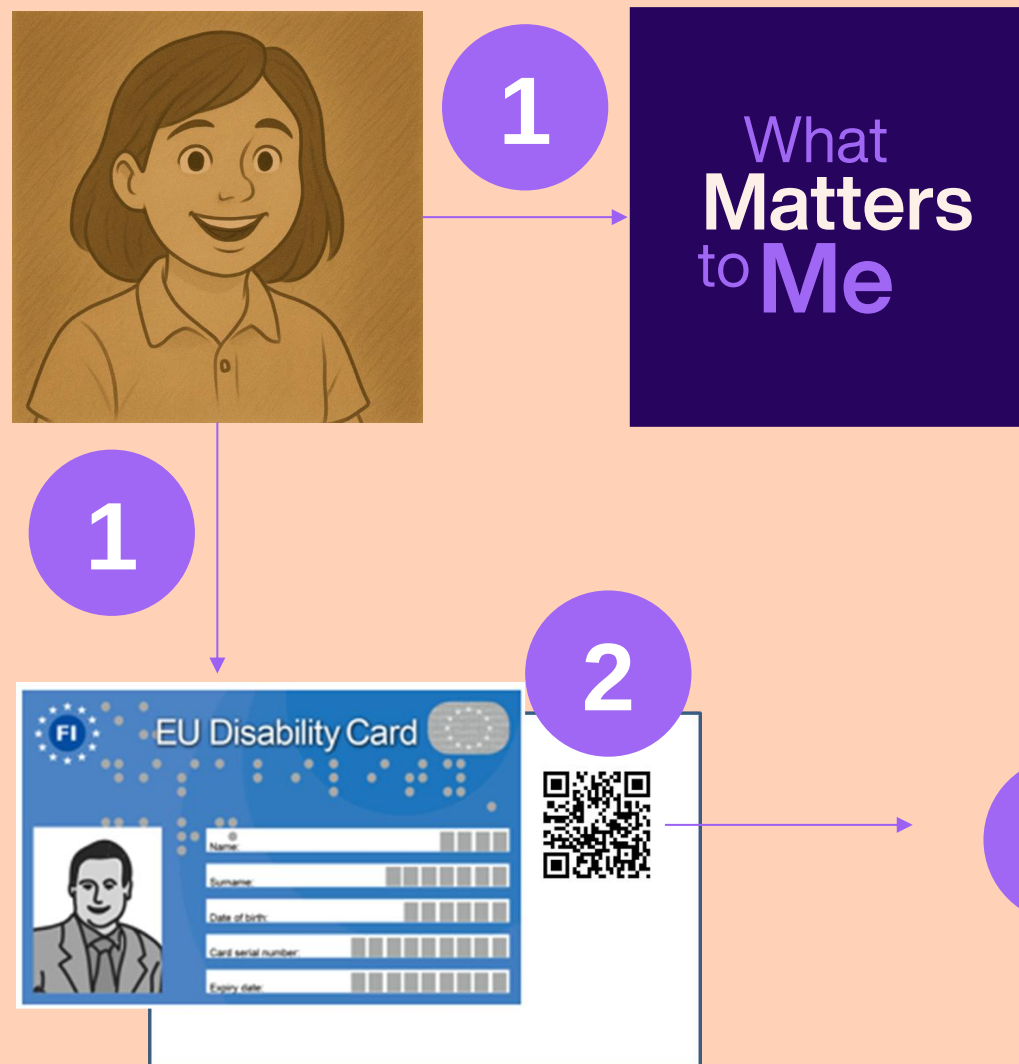

- *I'm free from uncertainty.*
- *I save time and effort.*
- *I get services that suit me.*
- *I live the way I want.*

- *Our processes speed up.*
- *We offer a better customer experience.*
- *We market in a new way and attract new customers.*
- *We are credible in responsible communication.*

AN USE CASE: EU DISABILITY CARD

- 1 Users describe their individual needs on the platform and link this information to their EU Disability Card as a QR code during the card ordering process.
- 2 The QR code is opened during the service encounter.
- 3 Information about the customer's individual needs is easily accessible to the service provider, enabling the customer to receive appropriate service.

WHAT MATTERS TO ME

English LOG IN

Need categories

- Communication
- Mealtimes
- Requirements for the accommodation room and equipment
- Experiencing the environment
- Assistance

EXPERIENCING THE ENVIRONMENT

I am sensitive to sounds

Additional information

I can't be in a space with loud noises or the clattering of dishes.

I need hearing protection devices in loud spaces

Necessary

Additional information

In case I forget my own hearing protection at home, it's good if some are available when needed.

Excessive noise stimuli cause me physical pain

Additional information

Pain can disable my ability to function. I want the option to leave the situation or place. You can offer help with leaving.

I have a hypersensitive sense of smell

Additional information

Strongly scented perfumes or plants cause me problems.

Don't touch me without my permission

Necessary

Additional information

Even a slight touch may feel painful to me.

I may stumble or trip

Additional information

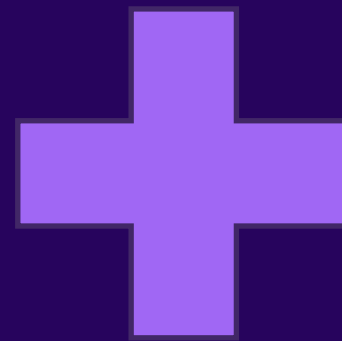

I don't perceive the boundaries of my body very clearly, and I may trip or bump into things

OUR KEY PRINCIPLES

Our platform is a next-generation application of the MyData concept.

At its core is the individual's own perspective on their situation, needs, and wishes. We are part of the MyData Global community and adhere to the community's principles in developing the platform.

- Secure
- Scalable
- Rapidly evolving
- Affordable

QUICK AND EASY IMPLEMENTATION
