

‘Integrative breeding strategies for the transition of European AQUAculture towards sustainable ORGanic production.’

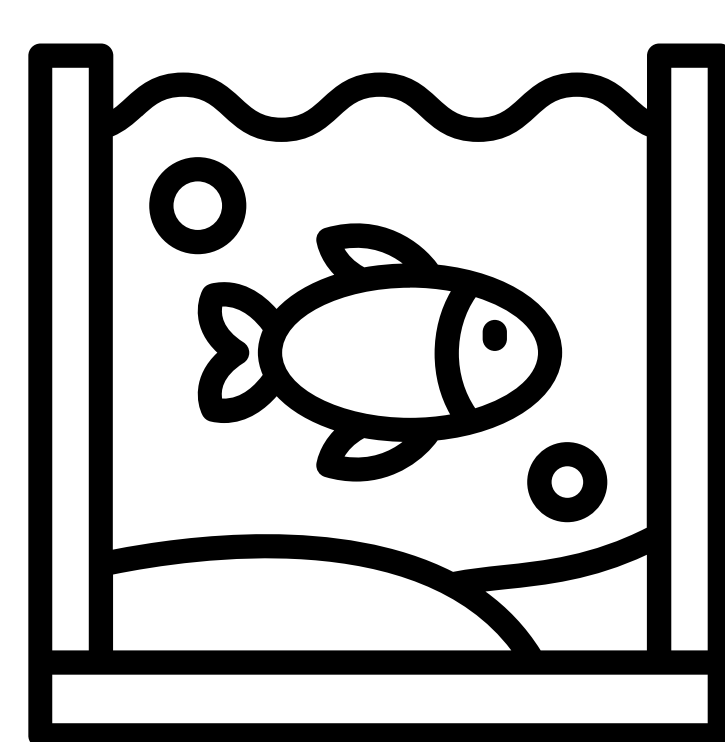

Horizon Europe Project: 101181589

12 Partners 7 Countries 48 Months €3M

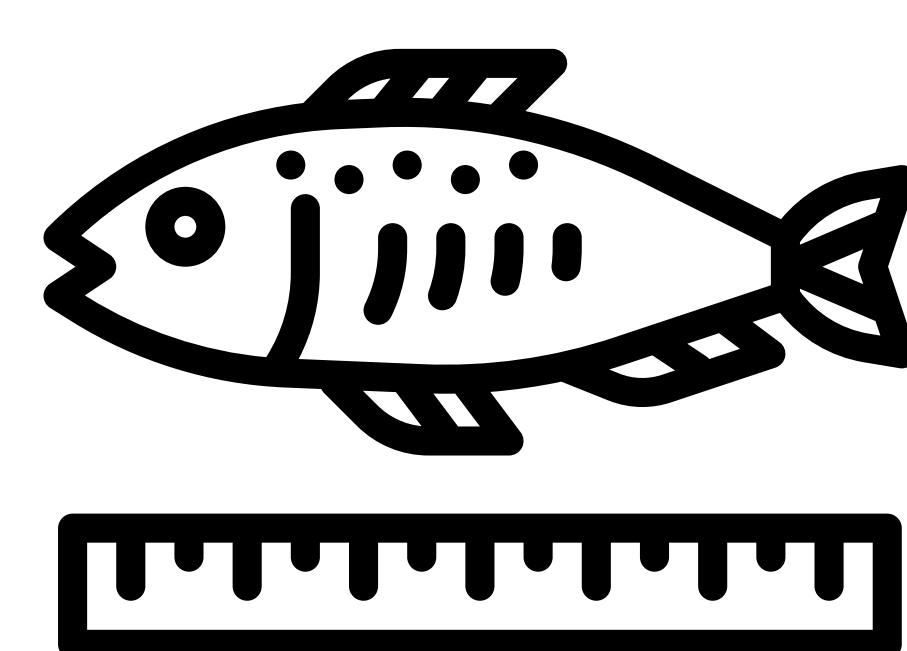

Integrative **Breeding**

Advanced tools for efficient genomic selection and control of reproduction and sex ratio.

Feed **Efficiency**

Novel tools for phenotyping feed efficiency using sustainable organic aquafeeds.

Disease **Resilience**

Genomic technologies for increased disease resilience and fish welfare under a One Health framework.

Consumer **Awareness**

Guidelines for effective labels and awareness interventions through consumer preference studies.
