

BOWING WALLS?

Restore the integrity of foundation walls with USS InvisiBeam® basement wall repair.

UNITED STRUCTURAL SYSTEMS

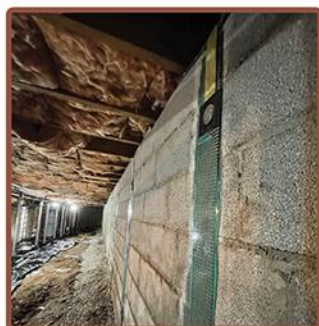

USS

BASEMENT WALL REPAIR

Common Causes

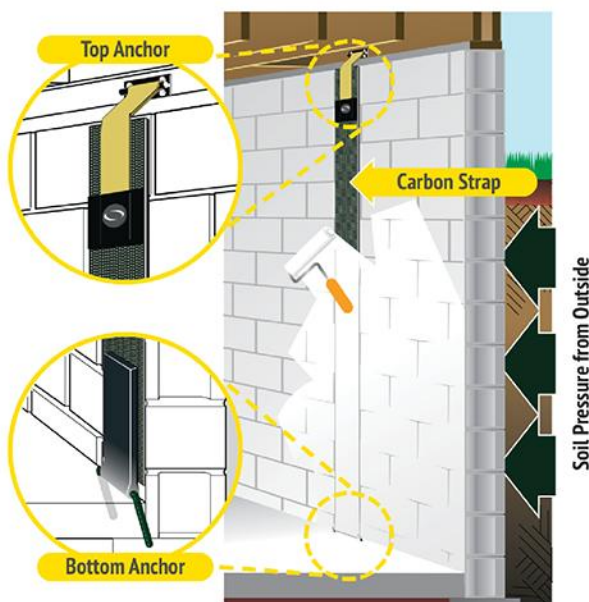

- Hydrostatic pressure from excess water in soil
- Seismic activity, natural disasters
- Poor wall design
- Expansive soil

USS InvisiBeam® by Fortress Stabilization Systems is the strongest carbon fiber strap available. Open grid technology, epoxy rivet technology, and ultimate tensile strength of 234,000 psi, creates unmatched support for basement walls, making them stronger than they were when first built.

Keeping Homes Dry & Stable Since 1994

- Carbon-Kevlar® strap installation
- Steel wall brace installation
- Caulk, epoxy, mortar for crack fill, tuckpointing

A complete system: ICC-ES certified, lifetime warrantied, backed by manufacturer.

The USS Difference
