

CC RACKS CROSS-DOCK SERVICES

Efficient Solutions for Streamlined Delivery

WHAT IS CROSS-DOCKING?

CC Racks' Cross-Dock Services simplify your supply chain by eliminating the high costs of multi-stop deliveries. Instead of sending your trucks to multiple retail locations, our cross-docking solution lets you deliver to one central CC depot. From there, we handle unloading, sorting, and final-mile delivery to stores within a 150-mile radius.

KEY BENEFITS

Cost Savings:

- Reduce trucking costs by avoiding multi-stop fees and over-the-road delays.
- Save on labor and freight by minimizing travel distances.

Speed-to-Market:

- Deliver products to retail stores faster, with final-mile delivery completed within 36 hours of depot receipt.
- Flexible delivery options, including night drops and operating hours.

Efficiency:

- Use of E-track lift gate trucks for quick and smooth deliveries.
- Reduce the risk of product damage with minimized storage and handling time.

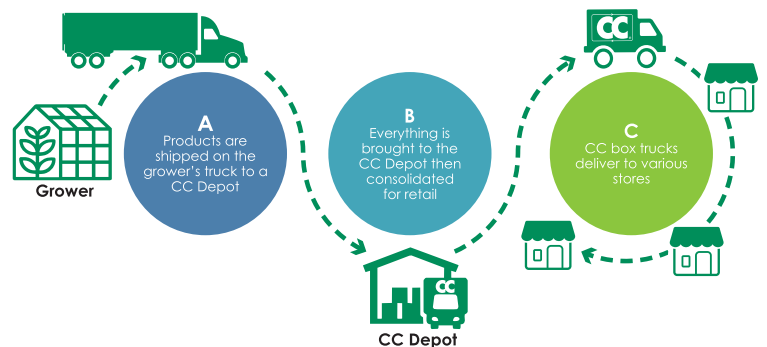

Flexibility and Recovery:

- Racks can be scanned and tracked for one-way program customers, moving off your rental balance as soon as they are returned.

HOW IT WORKS

- 1. Single Drop-Off:** Deliver a full truckload of plants to the nearest CC depot.
- 2. Cross-Docking Process:** We transfer floor-loaded plants to CC racks, sort, and prepare for final-mile delivery.
- 3. Delivery:** Products are delivered to designated retail stores, ensuring speed and reliability.

WHY CHOOSE CC RACKS?

Our expertise in horticultural logistics ensures that your products are handled with care, delivered on time, and optimized for cost efficiency. By partnering with CC Racks, you can focus on growing incredible plants while we take care of the logistics.
