Thematic Priorities

Energy Transition *Transitioning our energy systems to 100% renewable energy for all*	Nature Conservation *Protecting, connecting, and restoring 50% of nature in a Global Safety Net*	Regenerative Agriculture *Transforming food and fiber systems to feed 10 billion people sustainably while restoring life back to the soil*

Services Offered

The One Earth Solutions Framework	*Providing a science-based roadmap to stop climate change and biodiversity loss*
Knowledge-sharing	*Leading science to identify effective climate solutions, uncover funding gaps and opportunities, and disseminate findings through comprehensive reports and digital platforms*
Engagement & Partnerships	*Galvanizing people to support climate solutions across diverse bioregions and partnerships with scientists, organizations, and companies to drive change*
Storytelling	*Elevating solutions through inspiring stories and accessible tools*
Grantmaking	*Where possible, providing financial support to critical climate solutions around the world and connecting funders to on-the-ground, grassroots projects.*

Partners and Stakeholders

- Individual: Empowering people to take action on climate and biodiversity.
- Organizations: Partnering with grassroots organizations and mission-aligned companies.
- Scientists and Researchers: Collaborating with scientists and research organizations to advance climate and conservation solutions.
- Indigenous Leaders: Honoring Indigenous knowledge and supporting Indigenous-led organizations.
- Funders: Engaging a community to provide financial support for climate solutions.
