Year 13	8. Coastal environments	9. Hazardous environments	12. Environmental management	13. Global interdependence	Exam Practice and Revision	Exam Practice and Revision	n/a
	8.1 Coastal processes 8.2 Characteristics and formation of coastal landforms 8.3 Coral reefs 8.4 Sustainable management of coasts	Revisiting coasts from HT3B 9.1 Hazards resulting from tectonic processes 9.2 Hazards resulting from mass movements 9.3 Hazards resulting from atmospheric disturbances 9.4 Sustainable management in hazardous environments	12.1 Sustainable energy supplies 12.2 The management of energy supply 12.3 Environmental degradation 12.4 The management of a degraded environment	13.1 Trade flows and trading patterns 13.2 International debt and international aid development of international tourism 13.4 The management of a tourist destination	Exam Practice and revision for topics. Structuring of exam questions. Command words. Key words. Cambridge exemplar responses. Case studies	Exam Practice and revision for topics. Structuring of exam questions. Command words. Key words. Cambridge exemplar responses. Case studies	

Additional Notes:

Students undertaking A Level geography will need to be proactive in seeking out additional topical papers, news reports and case studies to stay up to date with current affairs. This will ensure students are developing an awareness of the relevance of the topics studied. Furthermore, students need to be proactive in completing additional exam practice questions and additional case studies with the completion of homework and independent learning, utilising this time effectively.
