

# Finishes

Custom Finishes to  
Match Your Vision

A woman with dark hair, wearing a white button-down shirt, stands in a modern, brightly lit interior with a glass and metal ceiling. She is holding a black smartphone in her left hand and reaching out with her right hand towards a glass door. The background shows a grid-like pattern of light coming through the ceiling.

## Finishes

Fully customisable, with quality finishes from around the world.

# Cabins

With our unique customisation options, your ideal lift can be built to your specifications.

Each cabin is designed with a balance of modern aesthetics, high-quality finishes, and lasting durability. From wood accents to luxury metals and glass, Meyer cabins can be tailored to fit both residential and commercial spaces, bringing together function and style.

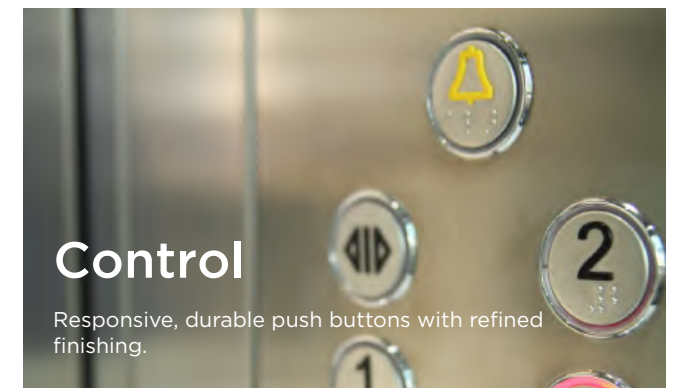

## Ceiling

Clean, functional design with subtle details for comfort and safety.

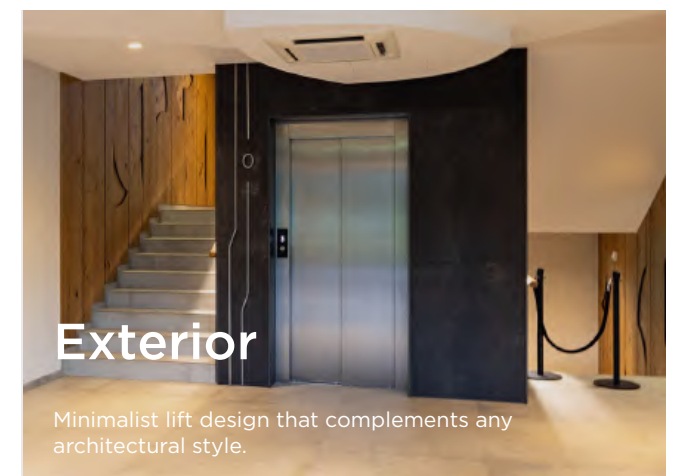

## Full Cabin

Bright, modern interiors designed for a seamless ride experience.

## Control

Responsive, durable push buttons with refined finishing.

## Exterior

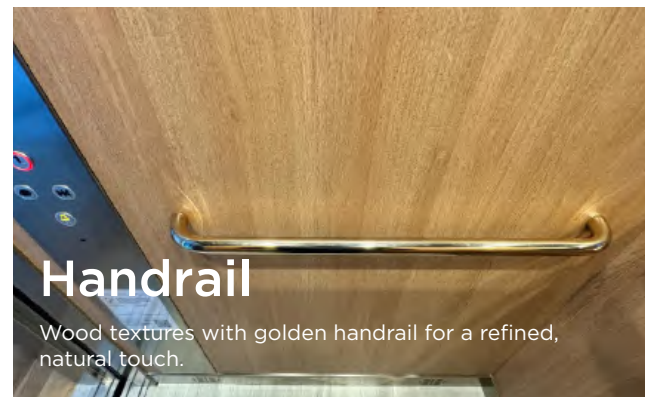

Minimalist lift design that complements any architectural style.

## Wood Finish Cabin

Elegant wood panels paired with soft lighting, creating a warm and premium cabin atmosphere.

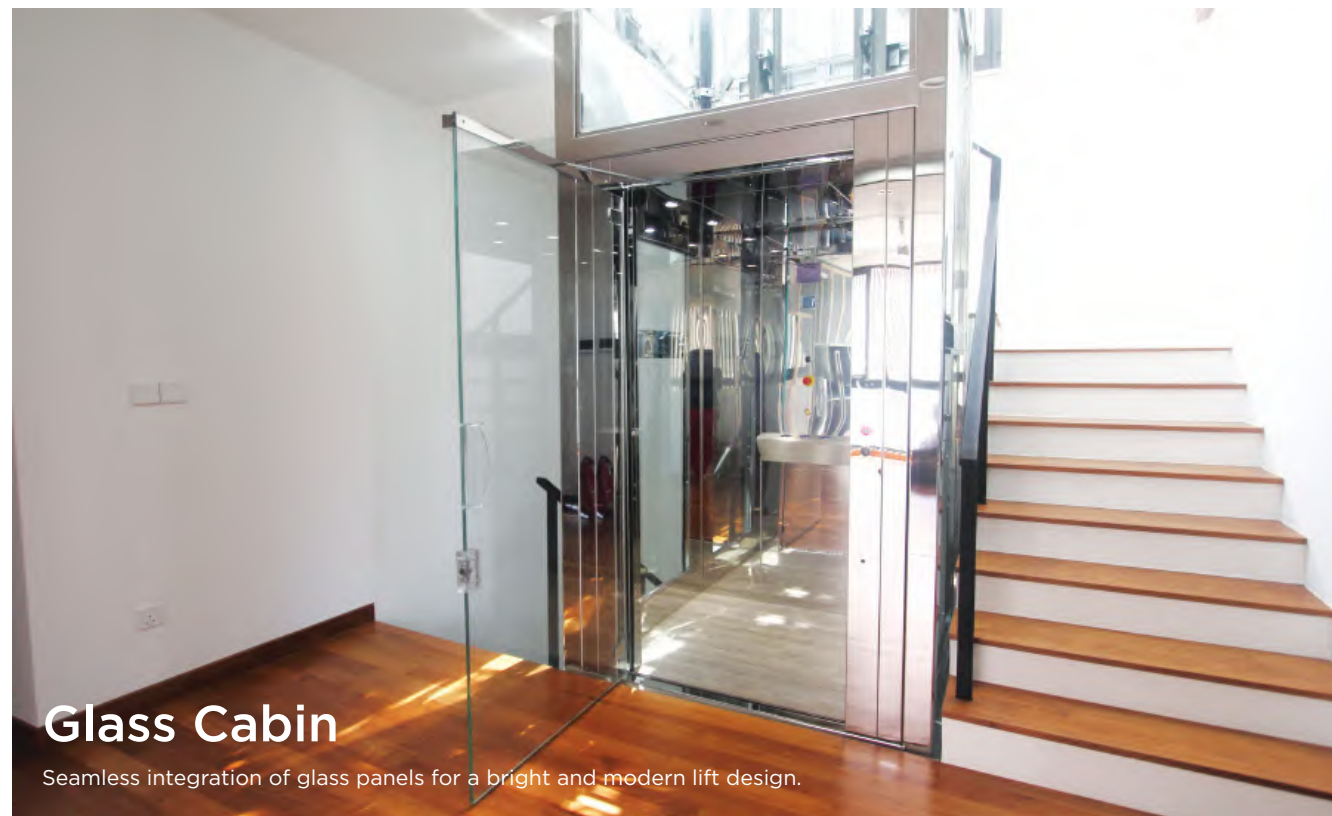

## Handrail

Wood textures with golden handrail for a refined, natural touch.

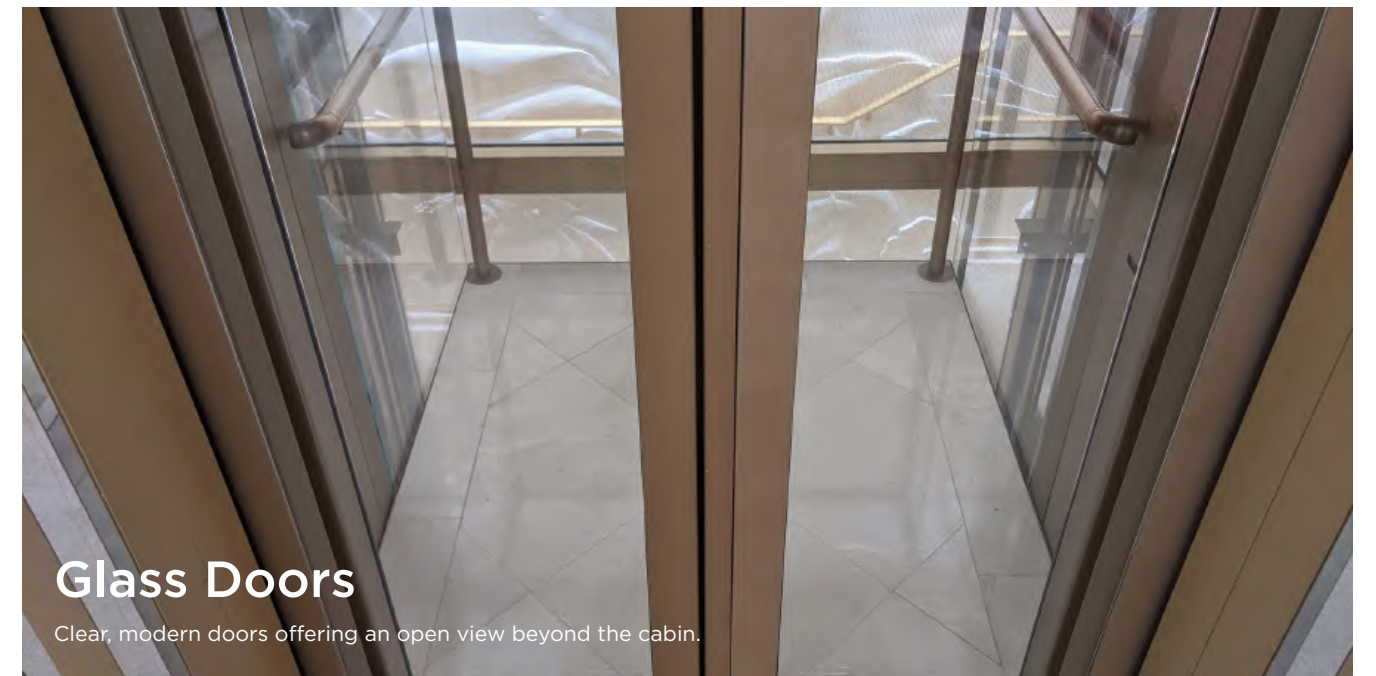

## Textured Wall Finish

Unique surface patterns that add warmth and character to the cabin interior.

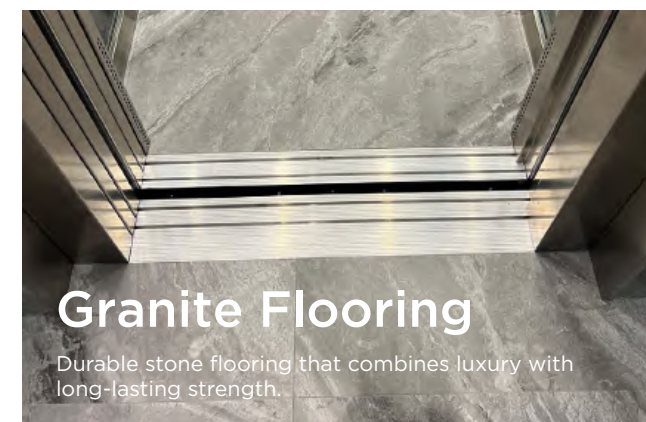

## Glass Cabin

Seamless integration of glass panels for a bright and modern lift design.

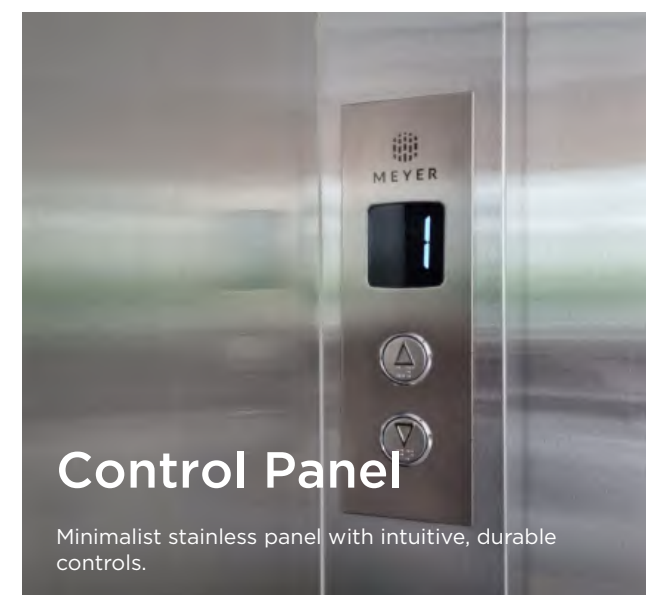

## Glass Doors

Clear, modern doors offering an open view beyond the cabin.

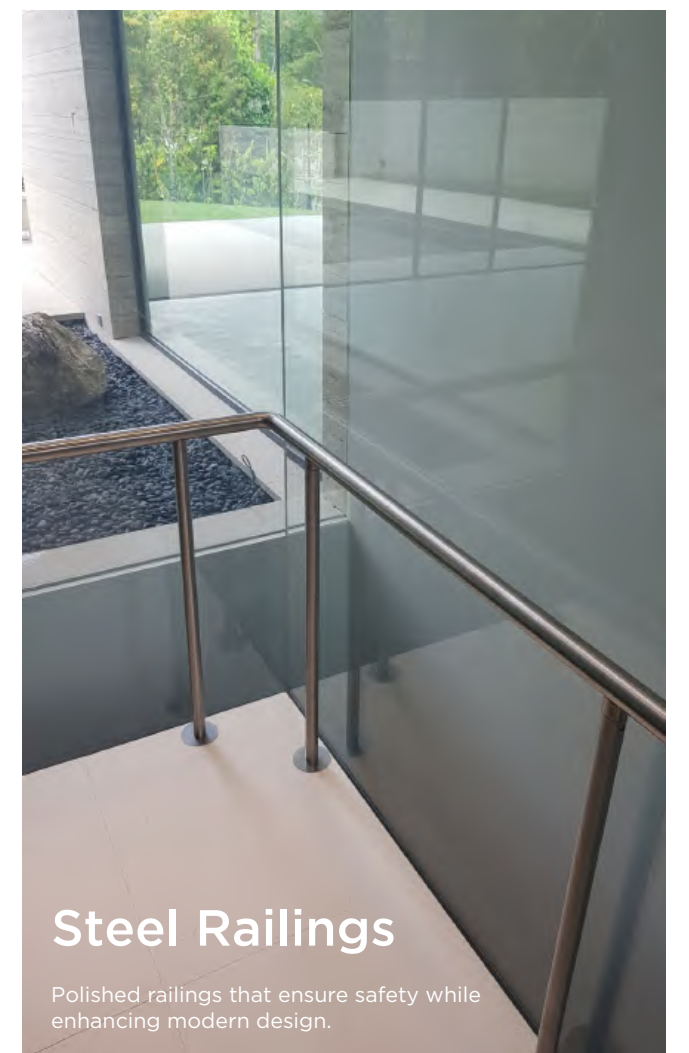

## Granite Flooring

Durable stone flooring that combines luxury with long-lasting strength.

## Control Panel

Minimalist stainless panel with intuitive, durable controls.

## Steel Railings

Polished railings that ensure safety while enhancing modern design.

# Finishing Organization

## Redefine the user experience

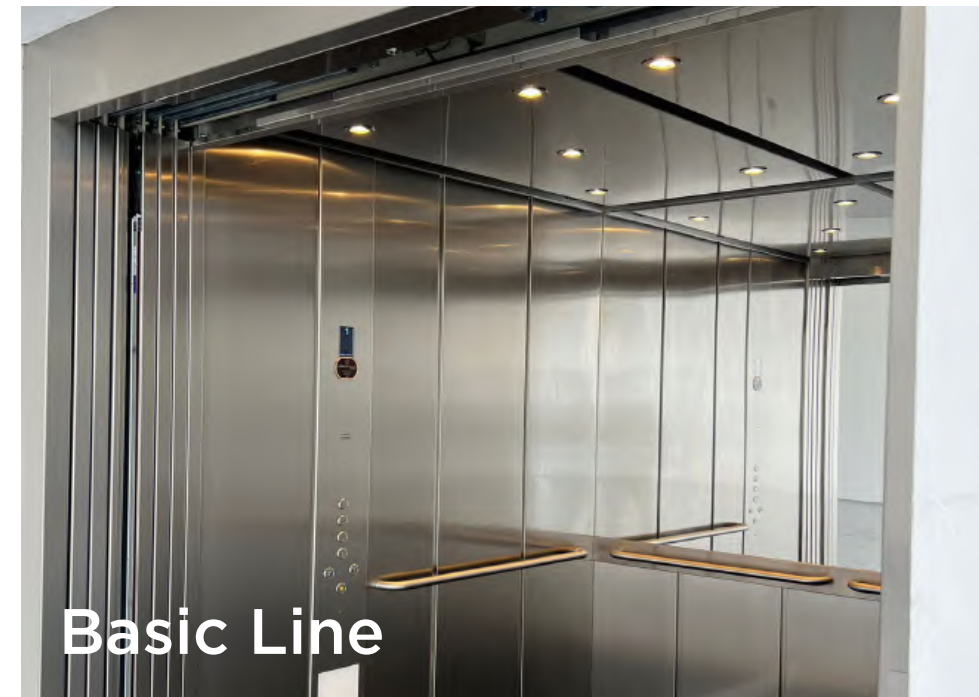

Every Meyer lift interior is more than just a cabin, it's a crafted environment that shapes how people feel and move through a space. With a focus on refined materials, precise engineering, and timeless design, Meyer elevates daily journeys into experiences of comfort and style.

## Tailored to your needs

Our curated Basic Line and Premium Line offer flexibility for every project. Select the essentials for reliability and function, or choose elevated finishes that reflect individuality and prestige.

## Built to last

Meyer lifts combine safety, durability, and modern design standards—meeting the expectations of Singapore's most discerning homes and commercial developments.

## Glass Cabins Options

At Meyer, our expertise lies in crafting stunning glass cabins that elevate both the function and aesthetic of any building. We offer a collection of square panoramic designs, each engineered with precision and a focus on detail. These lifts go beyond a simple mode of transportation; they are architectural features that seamlessly integrate into their surroundings, offering passengers a unique and memorable journey.

Our glass cabins are available with two distinct design options, allowing for perfect integration with your building's style. You can choose a sleek frameless glass construction for a modern, minimalist aesthetic that provides an uninterrupted and expansive view. Alternatively, our framed glass design offers a classic, defined look. Regardless of your selection, each cabin is filled with natural light, cultivating an open and secure atmosphere that transforms the feeling of an enclosed space into one of spacious elegance. We offer a range of customization options to ensure the glass elements, whether in the cabin, doors, or entire structure perfectly align with your architectural vision.

## Automatic Doors

At Meyer, we offer a comprehensive collection of automatic doors designed to provide a secure and seamless experience. Blending robust engineering with sophisticated aesthetics, our doors are crafted to meet the diverse needs of any modern building, from elegant residential complexes to high-traffic commercial spaces.

All of our standard and specialized automatic doors are built for durability and safety. They are highly customizable with a variety of finishes and configurations to suit your project's unique requirements. Our doors can also be specified to meet rigorous fire resistance and anti-vandal standards, ensuring both style and security are always a priority.

## Semi-Automatic Doors

Meyer's semi-automatic doors offer a perfect balance of modern aesthetics, reliability, and cost-effectiveness. These hinged doors are a practical solution for specific projects, providing a space-saving alternative for low-traffic residential or commercial buildings where full automation isn't necessary.

Our semi-automatic doors are crafted with durability and style in mind. They feature a transparent panel that provides a feeling of openness, while the frame is built from robust carbon steel and coated with high-quality stainless steel for a strong, refined finish. Handles and hinges are also made of stainless steel, ensuring lasting reliability. Functional components integrated into the design allow for adjustable closing speeds and include a 90° door stop for added control and ease of use. This makes our semi-automatic doors a smart, economical choice without ever compromising on quality or appearance.
