

## Manufacturing Mechanical Engineer

**Location:** Warman, SK (In-person)

**Job Type:** Full-time, Permanent

**Schedule:** Monday–Friday

**Salary:** TBD

**Benefits:** Dental, Extended Health, Life Insurance

### About the Role

We are seeking a **Manufacturing Mechanical Engineer** to support product design, quality control, and continuous improvement. This office-based role is ideal for someone detail-oriented, self-motivated, and experienced in agricultural manufacturing and welding processes.

### Key Responsibilities

- Create production drawings (AutoCAD/SolidWorks)
- Design equipment and components that meet industry standards
- Collaborate with machining and welding teams
- Review and improve engineering drawings and specifications
- Perform analysis, testing, and quality control
- Recommend design improvements and ensure manufacturability
- Communicate technical details with Shop Foreman and Management
- Review and update welding procedures
- Support continuous improvement initiatives
- Other duties as assigned

### Qualifications

- Bachelor's degree in Mechanical/Manufacturing Engineering
- APEGS registration required
- 2+ years engineering experience
- SolidWorks proficiency preferred
- Agriculture manufacturing experience required
- Strong mechanical, fabrication, and welding knowledge
- Excellent problem-solving and communication skills
- Familiarity with CSA Standards and hydraulic systems
