

NARROW AI VS GENERAL AI

NARROW AI (WEAK AI)

AI built for specific tasks. Performs well in its area but has not general intelligence or consciousness.

Exists today and is widely used in daily life, business, and industry.

Voice Assistants, Automatic Translators, Chatbots, Facial Recognition, Autonomous Vehicles, Search Engines, AI in Healthcare

Shapes industries, governance, and daily life; raises current ethical and social questions.

VS

GENERAL AI (STRONG AI)

Hypothetical AI with human-level or greater intelligence, including consciousness and the ability to perform any intellectual task as a human can.

Does not currently exist and remains theoretical or in science fiction.

Hypothetical Examples:
Sentient AI (conscious/emotional systems), Superintelligence (AI exceeding human intelligence across all fields), Sci-fi Portrayals

Fuels speculation about the future, influencing public imagination and policy debates but may overshadow immediate concerns.
