

The **Resources** tab is your central hub for managing all cloud and on-prem production infrastructure within the Inferno platform. From this page, you can view and control BitFire Engines, Spark™ Cloud Production Environments, Cloud Multiviewers, and both SRT and RTMP transmission endpoints.

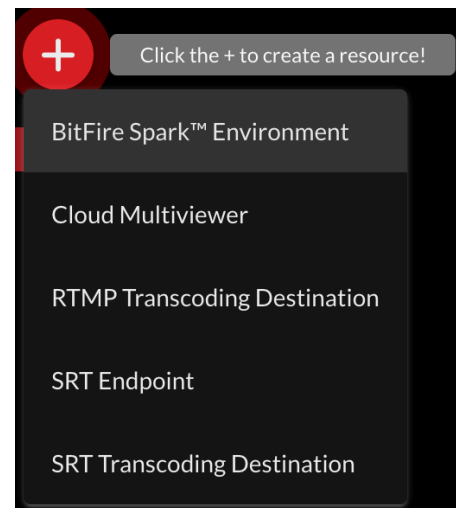

Creating a New Resource

To add a new resource:

1. Navigate to the **Resources** page.

2. Click the red and white + icon in the top-right corner.
3. Select one of the following options:
 - BitFire Spark™ Environment
 - Cloud Multiviewer
 - RTMP Transcoding Destination
 - SRT Endpoint
 - SRT Transcoding Destination

Each option will launch a purpose-built setup wizard for the selected resource.
