FRACTIONAL CADD MANAGER

Organizations with complex CADD environments often struggle with efficiency, software optimization, and workflow standardization. A Fractional CADD Manager provides expert oversight to streamline operations, enhance team performance, and implement best practices—without the expense of a full-time hire.

Strategic Workflow Optimization

Collaborate with engineers, project managers, and designers to develop strategies that improve efficiency and streamline workflows

CADD Management Leadership

Oversee CADD management, drafting standards, detail library development, data maintenance, and procedural frameworks.

Automation and Process Improvement

Work with project managers and discipline leads to automate commands and optimize tasks within CADD software.

Training and Development

Support the ORD super users group in creating training programs, conducting assessments, and onboarding new hires, interns, and staff.

Standards Development and Compliance

Establish, enforce, and maintain CADD standards to ensure consistency and project success for both internal teams and clients.
