Doppel Vision

The AI-native platform built for Social Engineering Defense.

How Doppel Vision Works

Protects people and brands from AI-powered impersonation, fraud, and social engineering by dismantling attacker infrastructure, not just detecting it.

Multi-Channel Monitoring & Detection

Continuously scans across domains, social platforms, ads, the dark web, app stores, SMS/telco, and more.

Threat Graph Correlation

Links separate alerts into a unified view of full campaigns and the underlying infrastructure.

Automated Takedown

Enacts cross-platform enforcement in minutes, cutting dwell time from days to hours.
Human Escalation When Needed

Expert analysts resolve complex cases requiring legal, policy, or platform-specific intervention.
Solutions Powered by Doppel Vision

Brand Protection

Detect, correlate, and dismantle impersonation threats targeting your brand across all digital channels.

Executive Protection

Safeguard high-profile leaders by detecting and disrupting impersonation, deepfakes, and personal data exposure across the web, social, and dark web.

Simulation

Test people, teams, and processes against realistic, multi-channel AI-powered social engineering campaigns to reduce risk exposure and strengthen readiness.

Powered by Doppel Vision

Graph-driven defense, multi-channel disruption, and agentic AI,

We connect the dots between attacker infrastructure, TTPs, and active campaigns – building a threat graph to show the whole scam, not just the symptoms.

The result:

- ✓ Faster takedowns
- ✓ Reduced attacker ROI
- ✓ Proactive defense

AI-Driven threat mapping, validation, and disruption

ATTACK SURFACES

EMERGING THREATS

FAKE SOCIAL PERSONAS	PAID ADS	SOCIAL IMPERSONATORS
SEO POISONING	DEEP FAKES	APP & BROWSER MALWARE
VISHING ATTACKS	TELEGRAM MESSAGES	SCAM TEXTS

TRADITIONAL THREATS

DOMAINS	URLS	EMAILS
DARKWEB		

AI CRAWLER · AI SCORING & VALIDATION · HUMAN VALIDATION · THREAT LINKING · DISRUPTION & TAKEDOWN

REAL-TIME THREAT GRAPH

AGENTIC AI LAYER

APIs

- SIEM
- SOAR
- EDR
- TIP
- INTERNAL SOC
- MSSP
- MDR
- SECURITY INT.

Doppel protects people and brands from AI-powered impersonation, fraud, and social engineering. We don't just detect threats, we dismantle the attacker's infrastructure across every channel it touches.

- ✓ Multi-channel signal ingestion
- ✓ Cross-surface correlation into unified threat graph
- ✓ Automated enforcement across registrars, telcos, ad networks, platforms
- ✓ Feedback loop → threat graph learns from every takedown
