SUSI LEETON ARCHITECTS + INTERIORS

SUSI LEETON

This riverfront home was reworked for multigenerational family life with one priority: let the landscape lead. “Our design philosophy was all about capturing the fall of the land, the view of the river, the sun, the shadows, the trees,” says designer Susi Leeton. With raw, pared-back architecture and minimal decorative detailing to interrupt the view, the transition between indoors and out feels effortless, giving the house an almost open-air quality. The owners love “the cocoon of our cosy house sitting within the landscape”. susileeton.com.au

LITERA DESIGN

BRONWYN LITERA

When the outlook is extraordinary, every design move has to work with it. Bronwyn Litera does exactly that in this living room in Sydney's Lavender Bay, using curved glazing, sliding doors and minimal detailing to dissolve the boundary to the terrace and its view. A nautical theme runs through the architecture, right down to the softened ceiling line echoing the arch of the Harbour Bridge. Low-slung seating and a muted palette keep the interior visually recessive, allowing water, sky and city to take centre stage. litera.design
