### Job Title

Fullstack Developer

### Location

Remote

### Client

Undisclosed

### Job Summary

We're looking for a highly skilled Fullstack Developer with at least 4+ years of hands-on experience to join our team and help build robust internal tools and automation systems. This role is ideal for someone who thrives in fast-paced environments, is comfortable working across the stack, and enjoys building smart systems that solve real operational challenges.

As a Fullstack Developer, you'll be responsible for designing and developing internal tools and platforms to streamline operations, automate workflows, and create intelligent agents. You'll work closely with product, operations, and technical stakeholders to deeply understand business needs and translate them into scalable, maintainable software solutions.

### **Responsibilities**

- Designing and developing full-stack applications to automate internal workflows
- Building custom tools and dashboards for internal users
- Developing intelligent agents and automation scripts that integrate across systems
- Working with modern LLM-based platforms (Lang Chain, ChatGPT, etc.) to create smarter tools
- Integrating with third-party tools and APIs (e.g., Auth0, Supabase, Zapier, n8n)
- Participating in code reviews, architecture decisions, and DevOps discussions

### **Qualification**

#### Frontend Experience:

- React, Next.js, Tailwind CSS
- Strong JavaScript fundamentals and modern frontend architecture

#### Backend Experience:

- Python (especially FastAPI and Django)
- Node.js knowledge is a plus

#### Database Skills:

- Proficiency in PostgreSQL and MongoDB

### **Apply to this position**
