Job Title

Developer Analyst

Location

Remote

Client

Undisclosed

Job Summary

The Epicor Developer / Analyst will be responsible for designing, customizing, optimizing, and supporting the company's Epicor ERP environment. This role combines hands-on technical development with business analysis, requiring strong collaboration with cross-functional teams to deliver scalable, efficient, and reliable ERP solutions that improve business operations and support continuous process improvement.

Responsibilities

Requirements Gathering & Analysis

- Work directly with business stakeholders to gather functional and technical requirements.
- Translate business needs into clear technical specifications and development tasks.

System Design & Development

- Develop integrations with third-party systems using REST and SOAP APIs.
- Design, develop, debug, and test Epicor ERP customizations using C#, .NET, SQL, SSRS, BAQs, BPMs, Dashboards, and JSON.
- Build and maintain Epicor Functions, custom modules, and UI customizations in both Classic and Kinetic (Application Studio) environments.

Testing, Validation & QA

- Create and execute test plans to validate functionality, performance, and integration with existing business processes.
- Modify program sequences or code as required to meet operational and technical requirements.

Application Support & Troubleshooting

- Provide Level 2 and Level 3 support for Epicor applications.
- Resolve complex technical issues and assist end users as needed.
- Maintain internal documentation for customizations, integrations, and system processes.

Upgrade & Feature Management

- Review Epicor release notes, new features, and patches.
- Update existing customizations and ensure compatibility during ERP upgrades.

Qualifications

- Must be based in Latin America (LATAM).
- Strong experience working with Epicor ERP in a developer and/or analyst capacity.
- Solid technical skills in C#, .NET, SQL, and Epicor-specific tools (BAQs, BPMs, Dashboards, SSRS).
- Experience developing integrations using REST/SOAP APIs.
- Familiarity with both Epicor Classic and Kinetic (Application Studio) environments.
- Strong analytical, problem-solving, and communication skills.
- Ability to work collaboratively with technical and non-technical stakeholders.
